F. Heim: Dipterocarpaceae.)

Marine Plankton Diatoms

by C. H. Ostenfeld — Copenhagen.

The following list of marine Plankton Diatoms is the result of an examination of the same 10 samples from which Johs. Schmidt¹⁾ has published the Peridiniales. All the samples were obtained from the surface of the Sea in the inner part of the Gulf of Siam and were preserved in formaline.

This is a list of the samples collected:

- | | | |
|--------|------------------------|--|
| No. 1. | ^{25/12} 1896. | Strait between Lem Ngob and Koh Chang. |
| " 2. | ^{9/1} 1900. | Between Koh Kadat and Koh Kut. |
| " 3. | ^{11/1} 1900. | S. of Koh Chang. |
| " 4. | ^{16/1} 1900. | W. of Koh Chang, N. of Koh Savan. |
| " 5. | ^{17/1} 1900. | W. of Koh Charz, S. of Koh Savan. |
| " 6. | ^{18/1} 1900. | S. of Koh Chang. |
| " 7. | ^{27/1} 1900. | North End of Koh Kut. |
| " 8. | ^{28/1} 1900. | 7 miles S. of Koh Kut. |
| " 9. | ^{31/1} 1900. | 18 miles W. of Koh Chang. |
| " 10. | ^{21/3} 1900. | 1—2 miles S. of Koh Kram. |

¹⁾ Johs. Schmidt: Peridiniales, in Flora of Koh Chang, Part IV, p. 129.
Reprinted from Botanisk Tidsskrift, Vol. 24, Aug. 1901.

The sample No. 1 is rather rich, but the main part consists of detritus and the few present diatoms are partly dead and broken; the samples No. 2 to No. 7 also contain but few Diatoms and Nos. 8 and 9 nearly none, while they are rich in *Trichodesmium* and *Heliotrichum*; they are of a more oceanic character than the other samples. On the other hand the sample No. 10 (gathered in March) is very rich in Diatoms as well in quality as in quantity, and it looks to me as if the coast-water in the Gulf of Siam in the spring produces a rich plankton, just as in our more temperate waters.

With regard to Plankton type in Cleve's sense, I must admit that most of the present samples ought to be classified among „Tropical Neritic Plankton“¹⁾, except Nos. 8 and 9 which belong to „Desmoplankton“. —

In the list the genera are arranged about as in F. Schütt: Bacillariaceae in Engler & Prantl, Natürliche Pflanzenfamilien, I, 1 b, 1896.

Behind the number of the sample I have indicated in brackets the frequency of the species by the ordinary plankton-symbols of frequency, viz.:

c means predominant

+, " rather common

r, " rare

rr, " very rare (only a few specimens seen).

Bacillariaceae.

A. Centricae.

Coscinodisceae.

Hyalodiscus Ehbg.

I. II. sp.

A very delicate *Hyalodiscus* without any visible structure is not rare in the samples.

2(r) — 3(r) — 4(rr) — 5(rr) — 6(rr) — 7(rr) — 10(rr).

¹⁾ P. T. Cleve: The Seasonal Distribution of Atlantic Plankton Organisms. Göteborg. 1900, p. 24. [In the list abbreviated to „Atl. Plankt. Organisms“.]

Stephanopyxis Ehbg.

2. *S. Palmeriana* (Grev.) Grun., Diat. Franz Joseph Land p. 38; A. Schmidt, Atlas d. Diat. Kunde, Pl. 130, f. 1, Pl. 123, f. 41 (f. *javanica* Grun.); Leuduger-Fortmorel, Diatomées de la Malaisie, Ann. du Jard. bot. de Buitenzorg, XI, 1893, p. 45; Otto Müller, Ber. Deutsch. Botan. Gesellsch. 1901, Bd. 19, p. 196, f. 1. *Crescellia Palmeriana* Grev., Trans. Microsc. Soc. 1865, p. 2, Pl. 1, f. 9; Cleve, Diat. f. the Sea of Java, Bih. till K. Svenska Vet. Akad. Handl. Bd. 1, 11, 1873, p. 8.

10 (rr).

Area: Neritic species, found in the Malay Archipelago, South China Sea, Arafura Sea, Australia.

Sceletonema Grev.

3. *S. costatum* (Grev.) Cleve, Diat. of the Sea of Java, 1873, p. 7; Leuduger-Fortmorel, l. c. p. 47; Van Heurck, Synopsis Pl. 91, f. 4; de Wildeman, Prodrome de la flore algologique des Indes Néerlandaises, 1897, p. 130; Lemmermann, Planktonalgen, Ergebnisse einer Reise nach dem Pacific, Abh. Nat. Verein, Bremen, XVI, 2, 1899, p. 317 and 329; Cleve, Atl. Plankton Organisms, p. 351; A Treatise of Phytoplankton, Upsala, 1897, p. 25; Pl. f. the Indian Ocean and the Malay Archipelago, p. 23, K. Sv. Vet. Akad. Handl. 35, No. 5, 1901 [1902].

1 (+) — 2 (rr) — 6 (rr).

Area: Baltic, North Sea, Coasts of British Isles, Ireland, Shetland to Westmannað (South of Iceland). Gulf of Bengal, Malay Archipelago, Pearl Harbour at Oahu (Sandwich Islands). Certainly a neritic species of the temperate and subtropical regions of all oceans.

Coscinodiscus Ehbg.

4. *C. bengalensis* Grun., Van Heurck, Synopsis, Pl. 132, f. 9; Rattray, Coscinodiscus, Proc. Royal Soc. Edinburgh, vol. 16, 1888—89, p. 580; Cleve, Pl. f. the Ind. Ocean and the Malay Archip., p. 20.

I refer a small form with radially arranged rows of very fine markings to this species.

2 (rr) — 3 (rr).

Area: Gulf of Bengal, Malay Archipelago.

5. *C. excentricus* Ehbg., Abh. Berl. Akad. 1839, p. 146, Mikrogeologie tab. 18, f. 32, tab. 21, f. 6; Van Heurck, Synopsis, Pl. 130, f. 4, 7; Leuduger-Fortmorel, l. c. p. 44; de Wildeman, l. c. p. 143; Cleve, Atl. Plankt. Organisms, p. 318; Pl. f. the S. Atlantic and the S. Indian Ocean, Öfv. af K. Sv. Vetensk. Förhandl. 1900, No. 8 [1901], p. 930; Pl. f. the Ind. Ocean and the Malay Archip., p. 20.

2 (rr) — 6 (rr).

Area: Found in all the Oceans, mostly along the coasts.

6. **C. Janischii** A. Schmidt, Atl. d. Diat. Kunde, Pl. 64, f. 3, 4. Rattray, Coscinodiscus, p. 543 and v. *arafurensis* p. 544; Grunow, Denksch. d. Wiener Akad. d. Wissensch. 1884, p. 76: *C. arafurensis* var. nov. Castr., Challenger Report, Botany, Vol. II, 1886, p. 153, Pl. 2, f. 4; *C. craspedodiscus* Castr. ibid. Pl. 3, f. 5; *C. Janischii* Cleve, Pl. f. the Indian Ocean and the Malay Archip. p. 20.

3 (rr) — 10 (rr).

Area: Gulf of Bengal, Malay Archipelago, Arafura Sea.

7. **C. nobilis** Grun., Journ. Roy. Microsc. Soc. 1879, p. 687, Pl. 1, f. 1; Leudiger-Fortmorel, l. c. p. 45; Rattray, Coscinodiscus, p. 545; Cleve, Pl. f. the Ind. Ocean and the Malay Archip. p. 20 and p. 56; *C. papuanus* Castr., Challenger Report p. 154, Pl. 3, f. 3.

The form observed resembles very much *C. papuanus* Castracane l. c.; it is about 250—300 μ in diameter; and I am following Professor Cleve in regarding *C. papuanus* as a form of *C. nobilis*.

3 (++) — 10 (rr).

Area: Great Britain, Gulf of Guinea, Malay Archipelago, Arafura Sea, South China Sea.

8. **C. oculus iridis** Ehbg., Abhandl. Berl. Akad. 1839, p. 147; *C. centralis* var. nov., Castr., Challenger, Pl. 2, fig. 3.

A form which agrees very well with the that figured by Castracane l. c., was found sparingly in one of the samples.

3 (rr).

Area: Found in all Oceans.

9. **C. radiatus** Ehbg., Abhandl. Berl. Akad. 1839, p. 148, Pl. 3, f. 1 a-c.

Forms, which I refer to this species, were found rather sparingly in most of the samples.

2 (r) — 3 (rr) — 4 (rr) — 6 (rr) — 7 (rr) — 10 (rr)

Area: Found in all Oceans.

Palmeria Grev.

10. **P. Hardmaniana** Grev., Van Heurck, Treatise on the Diatomaceae 1896, p. 538, f. 286; Cleve, Pl. f. the Indian Ocean and the Malay Archip. p. 22 and p. 56.

The interesting form of which I have given some figures, belongs to the genus *Palmeria* and I prefer identifying it with the only known species *P. Hardmaniana*, although the figure by Van Heurck is rather different. My specimens are very delicate, 500—650 μ long and 250—

300 μ broad, the valves are semi-lunate with very fine radiating points, hyaline central space and coarser points within the margins, but the more robust striae which Van Heurck l. c. p. 539 mentions, are only obscure in my form. The girdle is very unequal, narrow on the straight side and very broad on the curved side, so that the whole frustule resembles a piece of an orange.

Curious is a curved fissure on the valves; in most specimens which I have seen, this fissure was a place of refuge for a little protist, probably

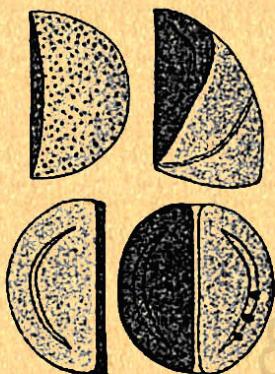

Fig. 1. *Palmeria Hardmaniana* Grev.
Cells in different views ($\frac{5}{1}$).

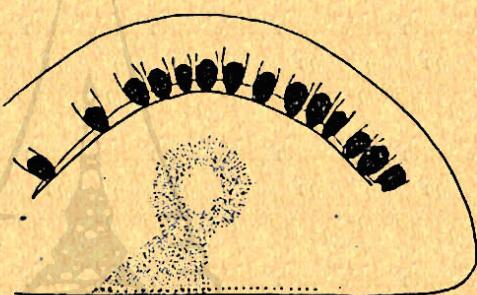

Fig. 2. *Palmeria Hardmaniana* Grev.
showing the Amphorella's fixed to the scale. ($\frac{20}{1}$)

an *Amphorella borealis* (Hensen) Dad., var. nov.; the small, more or less numerous, organisms were fixed to the inner side of the fissure.

Chromatophores are numerous, small, dispersed on the inner side of the frustules; the nucleus is placed close to the one valve.

Professor Cleve l. c. seems to take this large diatom as an asymmetrical form of *Coscinodiscus nobilis*, but I am quite convinced that this is not the case; on the other hand I believe, that the genus *Palmeria* is close to *Coscinodiscus*, and that Schütt in Engler & Prantl has made a mistake in placing his *Eucdia* (incl. *Palmeria*) among the *Biddulphioideae*, remote from the *Discoideae*. I should prefer placing it close to the genera *Ethmodiscus* and *Coscinodiscus*.

3 (rr) — 7 (rr) — 10 (rr).

Area: Malay Archipelago, China.

Actinodisceae.

Asterolampra Ehlg.

11. *A. rotula* Grev. in Transact. Microsc. Soc. 1860, p. 111, Pl. 3, f. 5; Lemmermann, l. c. p. 317 and 319, Pl. 2, f. 35; Ostenfeld & Schmidt, Pl. f. the Red Sea etc., Vid. Medd. Nath. For. Kjøbenhavn, 1901, p. 152; Schröder, Phytoplankton des Golfs von Neapel, Mitteil. a. d. Zool. Stat. zu

Neapel, Bd. XIV, 1900, p. 22; Cleve, Atl. Plankt. Organisms, p. 283; Pl. f. the Indian Ocean and the Malay Archip. p. 17; *A. Grevillei* var. *adriatica* Grun. in Van Heurck, Synopsis, Pl. 127, f. 12.

2 (rr) — 10 (rr).

Area: Tropical Western Atlantic Ocean, Mediterranean, Gulf of Aden, Indian Ocean, Pacific Ocean near the Sandwich Islands.

Asteromphalus Ehbg.

12. *A. flabellatus* (Bréb.) Grev., Quart. Journ. Microsc. Soc. 1859, p. 160, Pl. 7, f. 4; Van Heurck, Synopsis, Pl. 127, f. 5, 6 (var. *tergestina*); Cleve, Pl. f. the Ind. Ocean and the Malay Archip., p. 17; Diat. f. the Sea of Java, 1873, p. 5; Leuduger-Fortmorel, l. c. p. 43.

7 (rr).

Area: Mediterranean; Malay Archipelago, South China and Japan Seas; in Guano from Peru and California.

Solenicac.

Corethron Castr.

13. *C. erophilum* Castr., Challenger Report, p. 85, Pl. 21, f. 12, 14, 15; Cleve, Pl. f. the S. Atl. and the S. Ind. Ocean, p. 929; Pl. f. the Ind. Ocean and the Malay Archip., p. 20; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc., p. 156; *C. hystrix* Hensen, V. Bericht der Kommiss. in Kiel 1883, Pl. 5, f. 49; Cleve, Fish. Board for Scotland, 1896, p. 298, f. 15; Atl. Plankt. Organisms, p. 315; Lemmermann, l. c. p. 318.

10 (rr).

Area: Eastern part of Atlantic Ocean from Iceland southwards, Red Sea and Gulf of Aden, Antarctic Ocean (S. Atlantic and S. Indian Ocean) 32° S.—45° S. and 6° W.—91° E., Pacific Ocean at Vancouver Island.

14. *C. pennatum* (Grun.) Ostf. ms.; *Actiniscus pennatus* Grun. in Van Heurck, Synopsis, Pl. 82 bis, f. 11, 12; *Corethron hispidum* Castracane, Challenger Report, p. 86, Pl. 21, f. 3, 5; Lemmermann, l. c. p. 380, Pl. 3, f. 37, 43—46; Cleve, Pl. f. the Ind. Ocean and the Malay Archip., p. 20; Pl. f. the S. Atl. and the S. Indian Ocean, p. 930; ?*C. Murrayanum* Castr. l. c. p. 86, Pl. 21, f. 4.

I should think that the fragment figured in Van Heurck's Synopsis as *Actiniscus pennatus*, is the same form as known as *Corethron hispidum* Castr. (incl. *C. Murrayanum* which only differs from the typical *C. hispidum* in the smooth valves), and consequently the name *pennatus* has the priority.

6 (rr).

Area: Antarctic Ocean (S. Atlantic and S. Indian Ocean), Pacific Ocean at Vancouver Island.

Lauderia Cleve.

15. *L. annulata* Cleve, Diat. f. the Sea of Java 1873, p. 8, Pl. I, f. 7; Peragallo, Monogr. du Genre Rhizosolenia (Le Diatomiste Vol. 1, 1892), p. 105, Pl. I, fig. 11; Castr., Challenger p. 89, Pl. VIII, f. 7; Ostenfeld & Schmidt, Pl. from the Red Sea, etc. p. 158; Leuduger-Fortmørel, l. c. p. 47; Gran, Nyt Magaz. Naturv. Kristiania, 1900, p. 109, Pl. IX, f. 1—4; Cleve, Pl. f. the Indian Ocean and the Malay Archip. p. 21; non Cleve, Phytoplankton Pl. II, fig. 13—15.

1 (rr) — 3 (+) — 4 (rr) — 6 (rr) — 10 (r).

Area: Red Sea, Gulf of Bengal, Malay Archipelago, Antarctic Ocean.

Detonula (Schütt) Gran.

16. *D. delicatula* (Perag.) Gran, Nyt Magaz. Naturv. 1900, p. 112; *Lauderia delicatula* Perag., Monogr. Rhiz. p. 105, Pl. I, f. 13; Cleve, Phytoplankton, p. 24, Pl. 2, f. 21; Schröder, Neapel p. 23, Pl. 1, f. 9 a, b; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 157.

A species of *Detonula* which I refer with some hesitation to *D. delicatula*, has been found in some of the samples.

1 (rr) — 6 (rr) — 10 (rr).

Area: Tropical Atlantic Ocean, Mediterranean, Red Sea(?).

17. *D. Moseleyana* (Castr.) Gran, Nyt Magaz. Naturv. 1900, p. 113; Ostenfeld & Schmidt, Plankt. from the Red Sea, etc. p. 157; *Lauderia?* *Moseleyana* Castr., Challenger Report, p. 90, Pl. 24, f. 9; Monogr. Rhiz., p. 105, Pl. I, f. 10.

2 (rr) — 3 (rr).

Area: Red Sea, Arafura Sea.

Leptocylindrus Cleve.

18. *L. darucus* Cleve, Kanonhaaden „Hauch“s Togter, Kjøbenhavn, p. 54 (1879); Bih. t. Sv. Vet. Akad. Handl. XX, 3, No. 2, p. 15, Pl. 2, f. 4, 5; Schröder, Neapel, p. 25; Cleve, Pl. f. the Red Sea, p. 1033; Pl. f. the Indian Ocean and the Malay Archip. p. 21; Atl. Plankt. Organisms p. 332.

6 (rr) — 10 (rr).

Area: Eastern temperate Atlantic Ocean from Færöes and Norway southwards to Spain, Mediterranean, Red Sea, Malay Archipelago.

Dactyliosolen Castr.

19. *D. antarcticus* Castr., Challenger Report p. 75, Pl. 9, f. 7; Peragallo, Monogr. Rhiz. p. 104, Pl. 1, fig. 7; Cleve, Atl. Plankt. Organisms

p. 323; Pl. f. the S. Atlantic and the S. Indian Ocean p. 932; Pl. f. the Indian Ocean and the Malay Archip. p. 21.

2 (rr) — 6 (r).

Area: Eastern and Northern Atlantic Ocean, Antarctic Ocean, South Indian Ocean at 42° — 45° S. and 3° W. to 48° E.

20. **D. mediterraneus** Perag., Monogr. Rhiz. p. 104, Pl. 1, f. 8, 9; Schröder, Neapel p. 24; Cleve, Pl. f. the S. Atl. and S. Ind. Ocean p. 932; Pl. f. the Red Sea, Öfv. af K. Sv. Vetensk. Akad. Förhandl. 1900, No. 9 [1901], p. 1033; Atl. Plankt. Organisms p. 324; Pl. f. the Indian Ocean and the Malay Archip. p. 21; Ostenfeld, Vid. Medd. Nath. For. Kjøbenhavn, 1898, p. 428; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 157.

2 (+) — 4 (rr) — 5 (rr) — 6 (+) — 7 (rr) — 10 (rr).

Area: Temperate North Atlantic Ocean, Tropical Atlantic at Puerto Cabello, Southern Atlantic and Indian Ocean at 42° — 44° S. and 3° W.— 48° E., Mediterranean, Red Sea, Gulf of Aden, Gulf of Bengal, Malay Archipelago.

Lauderiopsis Ostf.

21. **L. costata** Ostf. in Ostenfeld & Schmidt, Pl. f. the Red Sea, etc., p. 158, f. 10.

This genus forms a connecting link between *Lauderia*, *Dactyliosolen* and *Guinardia*.

2 (r) — 6 (+).

Area: Red Sea.

Guinardia Perag.

22. **G. flacelida** (Castr.) Perag., Monogr. Rhiz. p. 107, Pl. 1, f. 3—5; de Wildeman, l. c. p. 122; Schröder, Neapel, p. 24; Ostenfeld & Schmidt, Pl. f. the Red Sea etc., p. 158; Cleve, Atlant. Plankt. Organisms p. 328; Pl. f. the Indian Ocean and the Malay Archip. p. 21; *Rhizosolenia?* *flacelida* Castr. Challenger p. 74, Pl. 29, f. 4.

3 (r) — 6 (rr) — 10 (rr).

Area: Temperate Atlantic Ocean from Norway southwards to 16° N., Mediterranean, Red Sea, Arafura Sea, Malay Archipelago.

Rhizosolenia (Ehbг.) Btw.

23. **R. alata** Btw., Micr. Journ. 1858, p. 96, Pl. 5, f. 7; Cleve, Diat. f. the Sea of Java, 1873, p. 11; Leuduger-Fortmorel, l. c. p. 36; de Wildeman, l. c. p. 123; Grunow, Novara Exp. p. 28; Peragallo, Monogr. Rhiz. p. 115, Pl. 5, f. 11; Schröder, Neapel p. 26; Ostenfeld & Schmidt, Red Sea p. 159; Cleve, Phytoplankton p. 24; Atlant. Plankt. Organisms p. 337; Red Sea p. 1034; Pl. f. the Atlant. and Indian Ocean p. 934; Pl. f. the Ind. Ocean and the Malay Archip. p. 22.

2 (rr) — 10 (rr).

Area: Atlantic Ocean from N. of Iceland to 41° S., Mediterranean, Red Sea, Indian Ocean to 33° S., Malay Archipelago, Pacific Ocean southwards to S. of New Zealand.

R. alata Btw. var. *gracillima* (Cl.) Van Heurek, Synopsis, Pl. 79, f. 8, 10; Peragallo, Monogr. Rhiz. p. 115, Pl. 5, fig. 12; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 160; Cleve, Pl. f. the Red Sea p. 1034; Atl. Plankt. Organisms, p. 342; Pl. f. the Indian Sea and the Malay Archipelago p. 23; *R. gracillima* Cleve, New Diatoms, K. Sv. Vet. Akad. Handl. Bd. 18, 5, 1881, p. 26, Pl. VI, f. 78; Phytoplankton p. 24; Schröder, Neapel, p. 26.

2 (rr) — 4 (rr) — 10 (r).

Area: Most parts of the Atlantic Ocean, Mediterranean, Red Sea, Gulf of Aden, Malay Archipelago.

R. alata Btw. var. *indica* (Perag.) Ostf. in Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 160; *R. indica* Peragallo, Monogr. Rhiz. p. 116, Pl. 5, f. 16; *R. alata* v. *corpulenta* Cleve, Phytoplankton p. 24, Pl. 2, f. 11; Atl. Plankt. Organisms p. 340; *R. corpulenta* Cleve, Pl. of the Ind. Ocean and Malay Archip. p. 22; *R. quadrijuncta* Peragallo, Monogr. Rhiz. p. 116, Pl. 5, f. 17.

Certainly the *R. indica* and *R. quadrijuncta* of Peragallo belong to the same species and this is further identical with the var. *corpulenta* of Cleve. I have given two sketches of the calyptre, showing different directions of the upper part.

1 (rr) — 2 (rr) — 3 (rr) — 10 (+).

Area: Tropical and Subtropical Atlantic, Red Sea, Gulf of Aden, Indian Ocean, Malay Archipelago, Yeddo Bay.

24. *R. amputata* Ostf., n. sp. (sect. *Squamoseae* Perag.).

Frustules large, 80—100 μ broad; valves (calyptrae) long-conic; squamae 5 in circumference; spine transversely cut off, with an excavation at the apex and a cavity in the lower part. Chromatophores numerous, small.

Allied to *R. arafurensis* Castr. (Challenger Report, p. 74, Pl. 30, f. 12; Peragallo, Monogr.

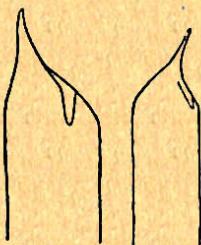

Fig. 3

Rhizosolenia alata Btw. var. *indica* (Perag.) Ostf. Two cells with different directions of the calyptra. ($\frac{172}{1}$).

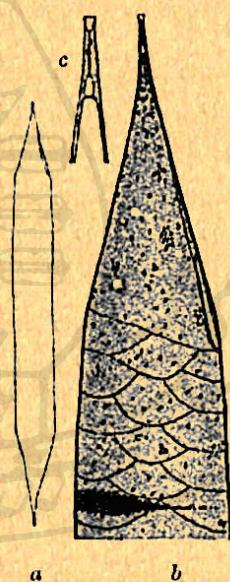

Fig. 4.

Rhizosolenia amputata Ostf. a a whole cell ($\frac{172}{1}$), b part of a cell ($\frac{200}{1}$), c the apex showing the form of the spine ($\frac{410}{1}$).

Rhiz. p. 111, Pl. 3, f. 6), from which it differs mainly in the form of the spine.

10(r).

25. *R. calcar avis* Schultze in Müll. Arch. 1858, p. 339, Pl. 13, f. 5—10; Peragallo, Monogr. Rhiz. p. 113, Pl. 4, f. 9, 10; Cleve, Diat. f. the Sea of Java, p. 11; Atl. Plankt. Organismus, p. 339; Pl. f. the Ind. Ocean and the Malay Archip. p. 22; Schröder, Neapel, p. 26.

The type has been found in a few specimens, which are quite like the specimens from the North Sea, but commonly it is replaced by the variety, var. *cochlea*, mentioned below.

1(rr) — 10(rr).

Area: Along the Atlantic coasts of Europe, Africa and America; Mediterranean, Malay Archipelago.

***R. calcar avis* Schultze, var. *cochlea* (Brun)**

Ostf. ms.; *R. cochlea* Brun, Diat. foss. et pelag. 1891, p. 43, Pl. 19, f. 9; Peragallo, Monogr. Rhiz. p. 113, Pl. 4, f. 11; Cleve, Pl. f. the Ind. Ocean and the Malay Archip. p. 22 and p. 56, Pl. 8, f. 12; Leuduger-Fortmorel, l. c. p. 36; de Wildeman, l. c. p. 123.

Cleve has figured a fragment of a frustule showing numerous, small chromatophores grouped in oblique or spirally twisted bands, but the rather numerous specimens which I have seen, had the small chromatophores in more or less distinct longitudinal bands. I consider it a variety of *R. calcar avis*, corresponding to the var. *indica* of *R. alata*.

2(rr) — 3(rr) — 6(rr) — 10(+).

Area: Indian Ocean, Malay Archipelago.

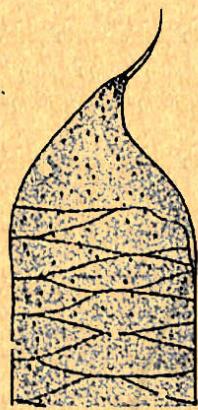

Fig. 5. *Rhizosolenia calcar avis* Schultze var. *cochlea* (Brun) Ostf. ($\frac{1}{10}$).

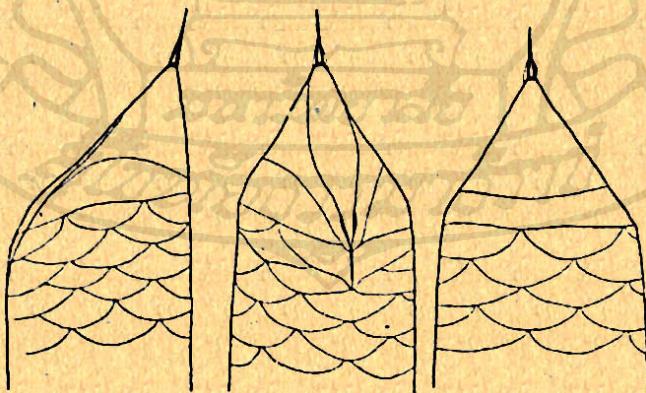

Fig. 6. *Rhizosolenia Clerci* Ostf. ($\frac{1}{10}$).

26. *R. Clevei* Ostf., n. sp. (sect. *Squamosae* Perag.).

Frustules large, 175—200 μ broad; squamæ 5 in circumference; spine as in *R. styliformis*; lines of the connection-surface with two thickened parts for the basal part of the spine; chromatophores numerous, small.

This interesting species is allied to *R. Debyana* Perag. It is the only species besides *R. styliformis* Btw., which includes the peculiar *Richelia intracellularis* Schmidt (in Ostenfeld & Schmidt, Pl. f. the Red Sea, p. 146, f. 2).

2 (rr) — 5 (rr) — 7 (+) — 10 (rr).

27. *R. cylindrus* Cleve, Phytoplankton p. 24, Pl. 2, f. 12; Atl. Plankt. Organisms p. 341; Schröder, Neapel p. 26; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 160.

I have figured two frustules of a form which I regard as *R. cylindrus* Cl., although the annulations are not quite like those figured by Cleve. The chromatophores are small.

10 (r).

Area: Tropical Atlantic Ocean, especially in its Western parts, Gulf of Naples, Gulf of Aden.

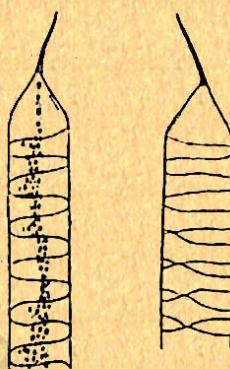

Fig. 7. *Rhizosolenia cylindrus* Cl. ($\frac{150}{1}$).

28. *R. formosa* Perag., Diat. de Villefranche p. 91, Pl. 6, f. 43, Monogr. Rhiz. p. 110, Pl. 2, f. 2; Cleve, Pl. f. the Indian Ocean and the Malay Archip. p. 23; Schröder, Neapel p. 25.

3 (rr).

Area: Mediterranean, Malay Archipelago.

29. *R. hyalina* Ostf. in Ostenfeld & Schmidt, Pl. f. the Red Sea, p. 160, f. 11; *R. pellucida* Cleve, Pl. f. the Indian Ocean and the Malay Archipelago p. 23 and p. 56, Pl. 8, f. 4.

2 (r) — 3 (rr) — 10 (+).

Area: Red Sea, Gulf of Aden, Malay Archipelago.

30. *R. imbricata* Btw., Microsc. Journ. 1858, Vol. VI, p. 95, Pl. 5, f. 6; Cleve, Diat. f. the Sea of Java p. 11; Van Heurck, Synopsis Pl. 79, f. 5, 6; Peragallo, Monogr. Rhiz. p. 113, Pl. 5, f. 2, 3; Schröder, Neapel p. 26; Ostenfeld & Schmidt, Pl. f. the Red Sea etc. p. 161; Cleve, Pl. f. the Indian Ocean and the Malay Archip. p. 23; *R. striata* Grev., Diat. 1(rr) — 2(rr) — 3(rr) — 6(rr) — 8(rr) — 10(rr).

Area: Tropical Atlantic Ocean, Mediterranean, Red Sea, Indian Ocean, Malay Archipelago, Pacific Ocean.

32. **R. setigera** Btw., Microsc. Journ. 1858, p. 95, Pl. 5, f. 7; Van Heurek, Synops. Pl. 78, f. 6—8; Peragallo, Monogr. Rhiz. Pl. 4, f. 15, 16, non f. 12—14; Hensen, Fünster Ber. Komm. Deutsch. Meere in Kiel, 1887, Pl. V, f. 38 a, b, c; Cleve, Fish. Board for Scotland 1896, p. 301, f. 12; Grunow, Novara Exp. p. 28; Cleve, Diat. f. the Sea of Java p. 11; Atl. Plankt. Organisms p. 347; Pl. f. the Ind. Ocean and the Malay Archip. p. 23; Ostenfeld & Schmidt, Red Sea, p. 171; Lemmermann, l. c. p. 317; Leuduger-Fortmorel, l. c. p. 36; de Wildeman l. c. p. 123; *R. japonica* Castr., Challenger p. 72, Pl. 23, f. 7.

The specimens are rather thin and delicate, about $8-10\mu$ broad.

1(r) — 2(rr) — 6(rr) — 7(rr) — 10(+).

Area: Atlantic Coasts of Europe and North of S. America, Mediterranean, Red Sea, Indian Ocean, Malay Archipelago, Japan Sea, Pacific Ocean. — Neritic species.

33. **R. Shrubsollii** Cleve, New Diatoms, 1881, p. 26; Van Heurck, Synopsis, Pl. 79, f. 11—13; Peragallo, Monogr. Rhiz. p. 114, Pl. 5, f. 8, 9; Cleve, Phytoplankton p. 25; Atl. Plankt. Organisms p. 347; Pl. f. the Red Sea, p. 1034; Pl. f. the Ind. Ocean and Malay Archip. p. 23; Schröder, Neapel p. 26; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 161; ?*R. atlantica* Peragallo, Monogr. Rhiz. p. 114, Pl. 5, f. 4—5.

2(rr) — 6(rr) — 10(rr).

Area: Atlantic Ocean in the Eastern part from the Færöes southwards, Mediterranean, Red Sea, Gulf of Aden, Indian Ocean, Malay Archipelago, Yeddo Bay.

34. **R. Stoltzfusii** Perag., Diat. de Villefranche, p. 90, Pl. 6, f. 44; Monogr. Rhiz. p. 108, Pl. 1, f. 17, 18; Cleve, Phytoplankton p. 25; Atl. Plankt. Organisms p. 348; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc.

p. 161; Cleve, Pl. f. the Ind. Ocean and the Malay Archip. p. 23; Schröder, Neapel p. 25; Lemmermann, l. c. p. 315.

2 (r) — 3 (rr) — 6 (r) — 7 (rr) — 10 (+).

Area: Northern Atlantic Ocean, especially in the North Sea and the English Channel, Mediterranean, Red Sea, Gulf of Aden, Malay Archipelago, China Sea, Yeddo Bay, Cook Strasse (S. of New Zealand). — Nartic species.

35. *R. styliformis* Btw., Micr. Journ. 1858, p. 96, Pl. 5, f. 5a, b, c, d; Van Heurck, Synopsis Pl. 78, f. 1—5, Pl. 79, f. 1, 2, 4; Peragallo, Monogr. Rhiz. p. 111, Pl. 4, f. 1—5; Grunow, Novara Exp. 1870, p. 28; Cleve, Diat. f. the Sea of Java p. 11; Atl. Plankt. Organisms p. 349; Pl. f. the S. Atl. Ocean and the S. Ind. Ocean p. 935; Pl. f. the Red Sea p. 1034; Pl. f. the Ind. Ocean and the Malay Archip.; Leuduger-Fortinorel, l. c. p. 36; Lemmermann, l. c. p. 315 and p. 317; Schröder, Neapel p. 26.

The type (about 25μ broad) is rather common in some samples, but usually it is replaced by var. *latissima*, corresponding to the var. *indica* of *R. alata*, and var. *cochlea* of *R. calcar avis*.

10 (+).

Area: Most parts of the Atlantic Ocean, Mediterranean, Red Sea, Indian Ocean, Malay Archipelago, Pacific Ocean, Antarctic Ocean.

R. styliformis Btw., var. *latissima* Btw., Microsc. Journ. Pl. 5, f. 5c; *R. styliformis* var. *polydactyla* (Castr.) Perag., Monogr. Rhiz. p. 111, Pl. 4, f. 7; *R. polydactyla* Castr., Challenger Report p. 71, Pl. 24, f. 2; *Rh. styliformis* var. *lata* Lemmermann, l. c. p. 315 and 351.

Differs only from the main species in the size (about $60—70 \mu$ broad).

1 (rr) — 4 (rr) — 10 (+).

Area: Antarctic Ocean, Malay Archipelago, French Pass at New Zealand.

36. *R. Temperei* Perag., Diat. Villefranche p. 91, Pl. 5, f. 40, Monogr. Rhiz. p. 110, Pl. 2, f. 3; Cleve, Pl. f. the Ind. Ocean and the Malay Archip. p. 22.

var. *acuminata* Perag., Monogr. Rhiz. p. 1, Pl. 3, f. 4; Schröder, Neapel p. 25, Pl. 1, f. 6 (f. *inaequalis*); Cleve, Atl. Plankt. Organisms p. 336; Limnerm. l. c. p. 317; *R. robusta* v. *recta* (nom. nud.) Ostenfeld, Vid. Medd. Nath. For. Kjöbenhavn, 1898, p. 427.

Only the var. *acuminata* Perag. has been found and I should think it to be a distinct

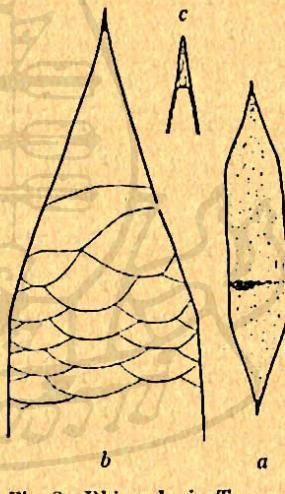

Fig. 8. *Rhizosolenia Temperei* Perag. var. *acuminata* Parag. a a whole cell ($\frac{60}{1}$). b part of a cell ($\frac{200}{1}$). c the apex, showing the form of the spine ($\frac{110}{1}$).

species, but I have never seen the true *R. Temperei*. I have figured a frustule and a part of it, showing the form of the spine.

3 (rr) — 10 (r).

Area: Of the main species: Mediterranean, Malay Archipelago; of the var. *acuminata*: Tropical Atlantic Ocean, Mediterranean, Pacific Ocean at Sandwich Islands.

Chaetocercaceae.

Bacteriastrum Shadw.

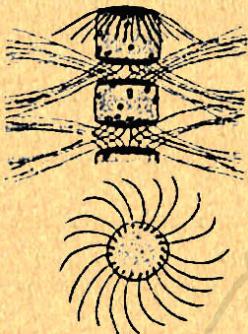

Fig. 9. *Bacteriastrum hyalinum* Land. Part of a chain with terminal cell; beneath a terminal cell, in side view, showing the terminal awns ($\frac{1}{10}$).

37. *B. hyalinum* Lauder, Trans. Micr. Soc. 1864, p. 8, Pl. 3, f. 7 a, b; Cleve, Atl. Plankt. Organisms p. 286; Pl. f. the Ind. Ocean and the Malay Archip. p. 18 and p. 54; *B. spirillum* ex parte and *B. rarians* var. *princeps* Castr., Challenger pp. 83, 84, Pl. 14, f. 2, Pl. 29, f. 1, 3.

This interesting species which Lauder has described and figured in 1863, has been forgotten for long time; Cleve has now pointed out that it is a distinct species and I am of the same opinion. I think it must be the same species which Gastracane in his report on Challenger-Diatoms has figured and named *B. rarians* var. *princeps* and also his figure Pl. 29, f. 1 of *B. spirillum* belongs hereto. The fig. 9 illustrate this species.

1 (rr) — 3 (r) — 6 (+) — 10 (+).

Area: Malay Archipelago, South China Sea.

38. *B. rarians* Lauder, Trans. Micr. Soc. 1864, p. 8, Pl. 3, f. 1—6; Cleve, Diat. f. the Sea of Java 1873, p. 8; Grunow, Novara Exp., 1870, p. 28; Leuduger-Fortmorel, l. c. p. 36; Cleve, Pl. T. the Ind. Ocean and the Malay Archip. p. 18; Schröder, Neapel p. 26; Van Heurck, Synopsis, Pl. 80, f. 3—5; *B. rarians* et var., *B. brevispinum* et var., *B. spirillum* ex parte, *B. Wallachii*, var. *hispida* Castr., Challenger p. 82—84, Pl. 15, f. 6, 8, Pl. 19, f. 2, Pl. 23, f. 1, 3; *Actiniscus rarians* Van Heurck, Synops. Pl. 82 bis, f. 10; *B. symmetricum* Leuduger-Fortmorel, l. c. p. 36, Pl. 7, f. 1.

I regard all the species described by Gastracane and Leuduger-Fortmorel as belonging to the very variable *B. rarians*.

1 (+) — 2 (r) — 3 (rr) — 4 (rr) — 5 (rr) — 6 (+) — 7 (rr) — 10 (c).

Area: Mediterranean, Red Sea, Gulf of Aden, Indian Sea, Malay Archipelago, South China Sea. A nearly allied form (var. *borealis* Ostenfeld, Nyt Magazin, Kristiania, 1901, p. 293, f. 5) is common along the Coasts of Western Europe.

Chaetoceras Ehbg.

39. **C. anglicum** (Grun.) Ostf. ms.; **C. furcellatus** Bail. var. *anglicus* Grun. in Van Heurck, Syn., Pl. 82, f. 3; **C. didymus** v. *longicruris* Cleve, Phytoplankton p. 21, Pl. I, f. 11, non f. 17; Schröder, Neapel p. 27; Cleve, Atl. Plankt. Organisms p. 301; Pl. f. the Red Sea, p. 1033; Pl. f. the Indian Ocean and the Malay Archip. p. 19; **C. longicrure** Ostentfeld & Schmidt, Pl. f. the Red Sea p. 154.

There is no doubt that the figure in Van Heurck, Synopsis Pl. 82, f. 3 represents the species which has been named *longicruris* by Cleve, and consequently the older name *anglicus* must have the priority.

2(rr) — 6(rr) — 7(rr) — 10(r).

Area: Subtropical Atlantic Ocean, Mediterranean, Red Sea and Gulf of Aden, Gulf of Bengal, Malay Archipelago.

40. **C. Auri*VIII*** Cleve, Pl. f. the Ind. Ocean and the Malay Archip. p. 18 and p. 54, Pl. 8, f. 10.

10(rr).

Area: Tropical Atlantic Ocean (7° N. 53° W.), Malay Archipelago.

41. **C. breve** Schütt, Ber. d. Deutsch-Botan. Gesellsch., 1895, p. 38, f. 4 a, b; Gran, Nyt Magazin Naturv., Kristiania 1900, p. 121; Ostenfeld, ibidem 1901, p. 295, f. 6; Cleve, Pl. f. the Indian Ocean and the Malay Archip. p. 18; **C. didymus** var. *hiemalis* Cleve, Phytoplankton p. 21, Pl. I, f. 18; **C. hiemalis** Cleve, K. Sv. Vet. Akad. Handl. 32, No. 8, 1900, p. 25, f. 9; Atl. Plankt. Organisms p. 304.

Professor Cleve to whom I sent my figure (fig. 10) thinks that the form belongs to the *C. breve* Schütt, and I can agree with him. It resembles striking small forms of *C. Lorenzianum* but is easily recognisable by the single chromatophore and the smooth awns.

2(rr) — 6(rr) — 7(rr) — 10(rr).

Area: Along the coasts of Europe from Westmannao at Island southwards to the English Channel; Malay Archipelago.

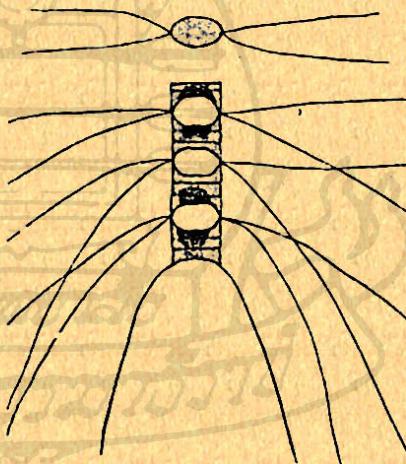

Fig. 10. *Chaetoceras breve* Schütt (2^{rr}).

42. **C. calrum** Cleve, Pl. f. the Ind. Ocean and the Malay Archip. p. 18 and p. 54, Pl. 8, f. 11.

With some hesitation I refer a form which I have seen in some of the samples to the new described *C. calrum* Cl. or to *C. tortissimum* Gran (Nyt Magaz. Naturv. Kristiania 1900, p. 122, Pl. 9, f. 25), those two species only differing in the number of chromatophores.

3 (rr) — 6 (rr) — 10 (rr).

Area: [of *C. calrum*] Malay Archipelago, [of *C. tortissimum*] coasts of the Northern part of Norway.

43. *C. clavigera* Ostf., n. sp.

Cells solitary or two together, 8—10 μ broad, mostly broader than long, awns of the one valve shorter and more clavate than those of the other valve; the thickened distal part of the awns with twisted striations and short spines. Valves elliptic. Chromatophore single, in front.

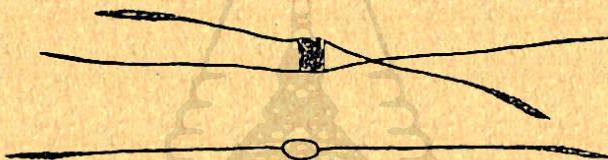

Fig. 11. *Chaetoceras clavigera* Ostf. ($\frac{4}{10}$).

This very characteristic species seems most allied to *C. simplex* Ostf. from the Caspian Sea.

6 (+).

44. *C. coarctatum* Lauder, Trans. Micr. Soc. 1864, p. 79, P. S., f. 8; Cleve, Diat. f. the Sea of Java 1873, p. 9, Pl. II, f. 10 a, b, c; Leuduger-Fortmorel, l. c. p. 37; Cleve, Pl. f. the Red Sea p. 1032; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 153; Cleve, Pl. f. the Indian Ocean and the Malay Archip. p. 18 and p. 54; *C. boreale*, v. *rudis* Cleve, Phytoplankton p. 20, Pl. I, f. 5; *C. rudis* Cleve, Atl. Plankt. Organisms p. 308.

Chromatophores numerous, small. As Cleve (Pl. 6 Ind. Ocean p. 54) has stated, the chains are often set with vorticells.

2 (rr) — 3 (rr) — 4 (rr) — 6 (rr) — 7 (rr) — 8 (rr) — 10 (r).

Area: Tropical Atlantic Ocean, Mediterranean, Red Sea, Indian Ocean, Malay Archipelago, Hongkong.

45. *C. compressum* Lauder, Trans. Micr. Soc. 1864, p. 78, Pl. 8, f. 6; Cleve, Diat. f. the Sea of Java 1873, p. 8; Leuduger-Fortmorel, l. c. p. 37; de Wildeman, l. c. p. 133; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 153; Cleve, Pl. f. the Indian Ocean and the Malay Archip. p. 18 and p. 55; *C. Kelleri* Brun, Espèc. nouvell., Le Diatomiste II, Pl. XVII, f. 91, 92.

I regard the *C. Kelleri* Brun which was found in oysters from Japan as identical with the *C. compressum* Lauder, and I have given a figure of the coarse, twisted awns of *C. compressum* in order to show this identity.

1 (rr) — 2 (r) — 3 (rr) — 6 (rr) — 10 (c).

Area: Red Sea, Malay Archipelago, Hongkong. — Neritic species.

46. *C. didymum* Ehbg. (1845); Cleve, Bih. t. Sv. Vet. Akad. Handl. Bd. 20, III, No. 2, 1894, p. 13, Pl. 1, f. 3, 4; Gran, Norske Nordhav's Expedition, Protophyta p. 16, Pl. 1, f. 8—10 and Pl. III, f. 37, 38; Cleve, Atl. Plankt. Organisms p. 301; Schröder, Neapel p. 27; *C. protuberans* Castr., Challenger p. 76, Pl. 8, f. 2, non Lauder.

10 (r).

Area: Along the Atlantic Coasts of Europe, Mediterranean, Japan Sea, Puget's Sound.

47. *C. distans* Cleve, Diat. f. the Sea of Java 1873, p. 9, Pl. II, f. 11 a, b; Leuduger-Fortmorel l. c. p. 37; de Wildeman, l. c. p. 133; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 154; Cleve, Pl. f. the Indian Ocean and the Malay Archip. 1902, p. 18 and p. 55; non Van Heurck, l. c. Pl. 82, f. 4; nec Cleve, Planktonundersökningar, Bih. t. K. Sv. Vet. Akad. Handl. B. 20, III, No. 2, 1894, p. 14, Pl. II, f. 2.

The chromatophore is solitary, the hoop rather narrow (see fig. 13).

1 (+) — 2 (rr) — 4 (rr) — 5 (rr) — 6 (rr)
— 7 (rr) — 10 (+).

Area: Malay Archipelago, Red Sea.

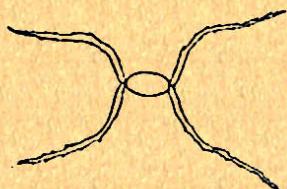

Fig. 12.

Chaetoceras compressum Laud.
Cell with twisted coarse awns,
in side view ($\frac{230}{1}$).

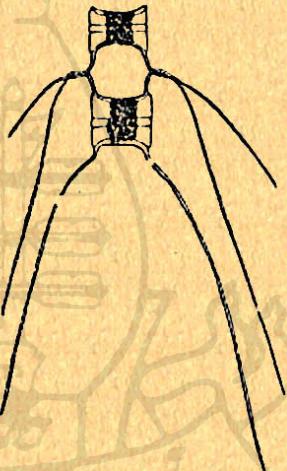

Fig. 13. *Chaetoceras distans* Gl.
Chain with chromatophores.

48. *C. diversum* Cleve, Diat. f. the Sea of Java 1873, p. 9, Pl. II, f. 12; Leuduger-Fortmorel, l. c. p. 37; Van Heurck, l. c. Pl. 81, f. 4; de Wildeman, l. c. p. 133; Cleve, Atl. Plankt. Organisms, p. 302; Plankt. f. the Ind. Ocean and the Malay Archipelago p. 18; Plankt. f. the Red Sea p. 154; *C. diversum* v. *tenuis* Cleve, Phytoplankton p. 21, Pl. II, f. 2; *C. diversum* v. *mediterranea* Schröder, Phytopl. d. Golfs v. Neapel, Mitteil.

d. Zool. Stat. zu Neapel Bd. 14, 1900, p. 27, Pl. I, f. 1; ?*C. rude* Leuduger-Fortmorel, l. c. p. 37, Pl. VI, f. 1.

The chromatophore is solitary and in front.

Rather common: 1(c) — 2(c) — 3(r) — 4(rr) — 5(rr) — 6(+) — 7(r)
10(+).

Area: Tropical neritic form, noted from Atlantic Ocean, Mediterranean, Red Sea, Indian Ocean, Malay Archipelago.

49. *C. javanicum* Cleve, Diat. f. the Sea of Java 1873, p. 10, Pl. 2, f. 13; Pl. f. the Indian Ocean and the Malay Archip. p. 19 and p. 55; Leuduger-Fortmorel l. c. p. 37.

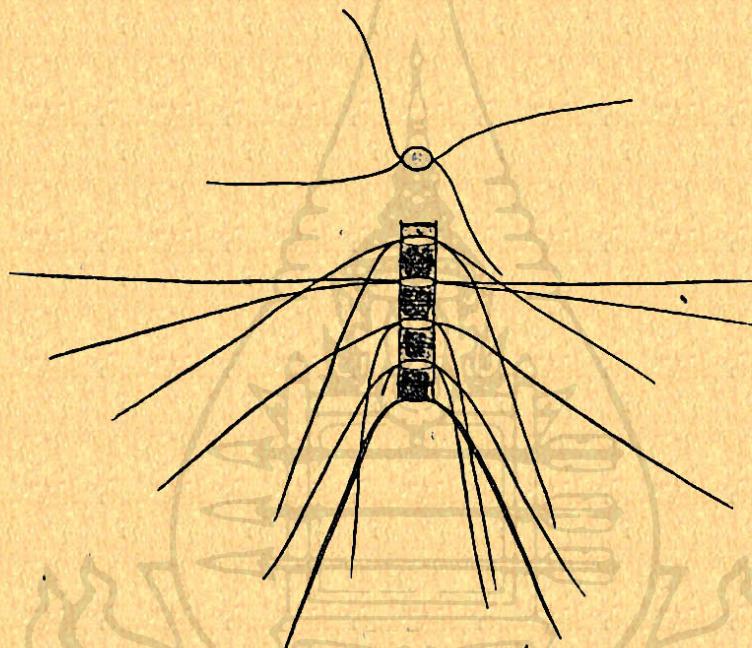

Fig. 14. *Chaetoceras javanicum* Cl. Chain in front view, cell in side view ($\frac{2}{1}$).

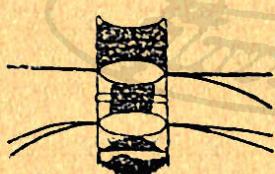

Fig. 15.
Chaetoceras javanicum Cl.
Chain with endospore in
front view ($\frac{12}{1}$).

This species is, as Cleve has lately stated, nearly akin to *C. Schüttii* Cl., if not identical; I have found some spores belonging to this species and they are about as the spores of *C. Schüttii*, both valves being spiniferous. It has one chromatophore in front; the terminal awns are diverging at an acute angle and thickened; the other awns are thin and turn off towards the ends of the chains; seen from the valves they have a characteristic curvature as shown in the figure.

1 (r) — 6 (rr) — 10 (+).

Area: Malay Archipelago.

50. **C. laeve** Leud.-Fortm., l. c. p. 38, Pl. 6, f. 2.

Leuduger-Fortmorel has (in his treatise on the diatoms of the Malay Archipelago) described and figured two species of *Chaetoceras*, viz. *C. rude* and *C. laeve*. The first of those is only a form of *C. diversum* Cleve, but the latter is a distinct species of which I here give a figure; it is related to *C. diversum*, but the thickened intercalary awns are smooth and of a characteristic curvature, first being nearly parallel and then abruptly turning off at a right angle. Chromatophore a single plate in front. Breadth of the cells 9—16 μ .

1 (+) — 6 (rr) — 10 (-).

Area: Sea of Java.

51. **C. Lorenzianum** Grun., Verhandl. d. k. k. zool.-botan. Ge-sellsch., Wien 1863, p. 157, Pl. 14, f. 13; Cleve, Diat. f. the Sea of Java, 1873, p. 9; Leuduger-Fortmorel, l. c. p. 37; de Wildeman, l. c. p. 134; Van Heurek, Synopsis Pl. 82, f. 2; Cleve, Phytoplankton, p. 21, Pl. 1, f. 13—15; Schröder, l. c. p. 29; Cleve, Pl. f. the Red

Sea p. 1033; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 154; Cleve, Pl. f. the Ind. Ocean and the Ma'ay Archip. p. 19; Atl. Plankt. Organisms p. 306; *C. cellulosum* Lauder, Trans. Mier. Soc. 1864, p. 78, Pl. 8, f. 12; *C. distans, forma setis evidentius punc'utis* Van Heurek, Syn. P. 82, f. 4.

Rather common: 1 (+) — 2 (rr) — 3 (rr) — 6 (rr) — 10 (c).

Area: Atlantic from North Sea southwards, Mediterranean, Red Sea, Gulf of Aden, Indian Ocean, Malay Archipelago, Hongkong.

52. **C. paradoxum** Cleve, Diat. f. the Sea of Java 1873, p. 10, Pl. 3, f. 16; Pl. f. the Ind. Ocean and the Malay Archip. p. 19 and p. 55; Leuduger-Fortmorel l. c. p. 37.

2 (rr) — 10 (rr).

Area: Malay Archipelago.

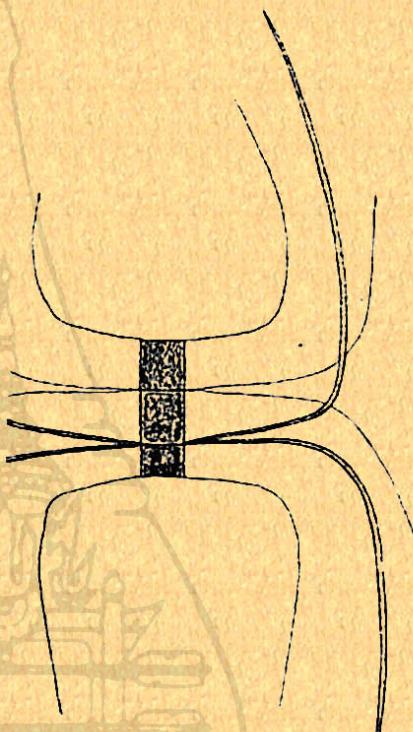

Fig. 16. *Chaetoceras laeve* Leud.-Fortm.
 $(\frac{130}{1})$.

53. *C. peruvianum* Btw., Microsc. Journ. 1856, p. 107, Pl. 7, f. 16—18; Cleve, Fish. Board for Scotland, 1896, p. 299, f. 7; Leuduger-Fortmorel, l. c. p. 37; Cleve, Pl. f. the Indian Ocean and the Malay Archip. p. 19; Pl. f. the S. Atlantic and the S. Indian Ocean, p. 929; Pl. f. the Red Sea p. 1033; Lemmermann l. c. p. 317.

This species is very variable; several new species have been described upon forms of it, but it seems incorrect to me to give them specific range. I should think they are to be arranged in three groups after their coarseness and size, viz.:

f. 1, *volans* (Schütt). Rather slender, awns rather thin: *C. volans* Schütt, Ber. d. Deutsch. Botan. Gesellsch. 1895, f. 20, *C. currans* Cleve, Fish. Board for Scotland, p. 299, f. 8. Arctic and northern Atlantic form.

f. 2, *typica*. Intermediate between 1 and 3; *C. peruvianum* Btw. l. c.; Cleve, l. c. p. 299, f. 7; Schröder, Neapel p. 29, Pl. 1, f. 4 (f. *gracilis*). Tropical parts of the Oceans.

f. 3, *robusta* Cleve. Coarse and with coarse awns. *C. peruvianum* v. *robustum* Cleve, Diat. f. the Sea of Java, 1873, Pl. 2, f. 8; *C. boreale*? Lauder, Transact. Microsc. Soc. Vol. 12, 1863, Pl. 7, f. 7; *C. robustum* Ostf. in Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 145; *C. curvatum* Castr., Challenger Report p. 78. Tropical and Antarctic parts of the Oceans.

f. 2: 1 (rr) — 2 (rr) — 3 (rr) — 6 (r).

f. 3: 1 (rr) — 10 (+).

Area: Arctic and Atlantic Ocean, Mediterranean, Red Sea, Indian Ocean, Malay Archipelago, China Sea, Pacific Ocean, Antarctic Ocean.

54. *C. pseudocrinitum* Ostf., Nyt Magaz. Naturv., Kristiania, 1901, p. 300, f. 11; *C. crinitum* Gran, Norsk Nordhav Expedition, Protophyta 1897, p. 22, Pl. 4, f. 51, non Schütt, 1895.

This little species which I have described from Danish waters and which Gran has found on the Norwegian coasts, was also met with in the Gulf of Siam, but sparingly.

10 (rr).

Area: Limfjord, Kattegat, Coast of Norway.

55. *C. Ralfsii* Cleve, Diat. f. the Sea of Java 1873, p. 10, Pl. III, f. 15; Leuduger-Fortmorel, l. c. p. 37; de Wildeman, l. c. p. 134; Cleve, Pl. f. the Indian Ocean and the Malay Archipelago, p. 19 and p. 55; non Van Heurck, Syn., Pl. 82 bis, f. 3.

The chromatophore is solitary and in front.

2 (rr) — 6 (rr).

Area: Malay Archipelago.

56. *C. rostratum* Laud., Trans. Microsc. Soc. 1864, p. 79, Pl. 8, f. 10; Cleve, Pl. f. the Ind. Ocean and the Malay Archip. p. 19; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc., p. 155.

This species belongs to the subgenus *Phaeoceras* Gran, which has numerous small chromatophores, also in the awns.

10 (r).

Area. Red Sea, Malay Archipelago, South China Sea.

57. *C. Schmidtii* Ostf. in Ostenfeld & Schmidt, Plankt. f. the Red Sea, etc. p. 155, f. 8; ?*C. Weissflogii* Cleve, Pl. f. the Indian Ocean and the Malay Archipel. p. 15 and p. 55, non Schütt.

This species which I have described from the Red Sea, occurs also in the Gulf of Siam; and I suppose that it is the same which Cleve l. c. has identified with *C. Weissflogii* with hesitation.

10 (r).

Area: Red Sea, Malay Archipelago (?).

58. *C. secundum* Cleve, Diat. f. the Sea of Java 1873, p. 10, Pl. II, f. 14 a, b; Leuduger-Fortunorel, l. c. p. 37; de Wildeman, l. c. p. 134; Van Heurek, Synops., Pl. 82, f. 5; *C. curvisetum* Cleve, Pl. f. the Ind. Ocean and the Malay Archipelago 1902, p. 18 and p. 55, non Cleve, in Kanonbaaden Hauchs Togter, Kjöbenhavn, 1889, p. 55 with fig.

Professor Cleve supposes (in his last paper (l.c. 1902, p. 55)) that the Indian *C. secundum* is the same as *C. curvisetum* from the Temperate Atlantic, but I can not enter upon this opinion, as the spores of *C. secundum* figured by Cleve himself (1873, Pl. II, f. 14 a) are rather different from the spores of *C. curvisetum* (see Gran, Protophyta, Pl. II, f. 22).

2 (rr) — 3 (r) — 4 (rr) — 5 (rr)
— 6 (rr) — 10 (r).

Area: Malay Archipelago.

59. *C. siamense* Ostf. n. sp.

Chains straight, about 50μ broad; valves circular; foramina lanceolate; hoop at least a third part of the cell; chromatophores two, close to the valves; awns all alike, rather robust, undulated; the one about in the sagittal plane, the other diverging at a nearly right angle.

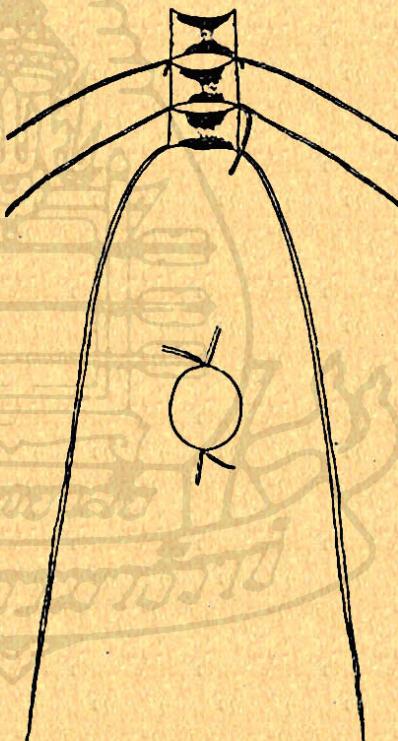

Fig. 17. *Chaetoceras siamense* Ostf., Chain in front view, cell in side view ($\frac{200}{1}$).

I have seen but few chains of this large species, which has some relations to *C. constrictum* Gran (the two chromatophores) and others to *C. teres* Cl. and *C. Weissflogii* Schütt (the form of the valves and the awns).

10 (rr).

Obs. The undulations of the awns are not well drawn in the figure.

60. *C. tetrastichon* Cleve, Phytoplankton p. 22, Pl. I, f. 7; Schröder, l. c. p. 30; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 256; Cleve, Pl. f. the Indian Ocean and the Malay Archipelago p. 19.

2 (rr).

Area: Tropical Atlantic Ocean, Naples, Red Sea, Malay Archipelago.

61. *C. Vanheurckii* Gran, Norske Nordhav Expedition, Protophyta, p. 18; *C. Ralfsii* Van Heurck Synopsis, Pl. 82 bis, f. 3, non Cleve.

I have found a form which I identify with the *C. Vanheurckii*, described by Gran in his excellent paper on the Norwegian species of *Chaetoceras*. My figures of a part of a chain and of the spores agree

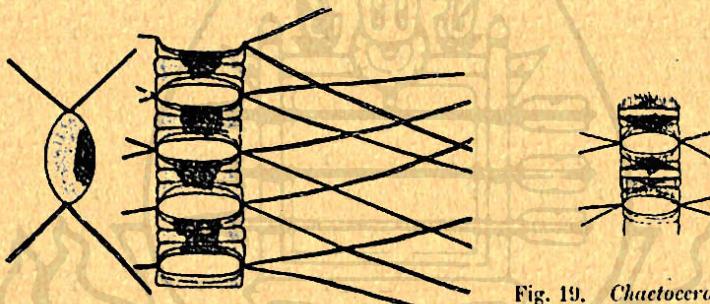

Fig. 18. *Chaetoceras Vanheurckii* Gran. Chain in front view, cell in side view ($\frac{125}{1}$).

Fig. 19. *Chaetoceras Vanheurckii* Grn. Chain with endospores in front view ($\frac{225}{1}$).

rather well with the description by Gran; the chains are straight, foramina lanceolate to narrow-elliptic, hoop about a third part of the cell with constricted sutures; chromatophore one; awns straight, seen from the valve diverging at a right angle; spores about in the middle of the cells, primary valve arcuate with numerous spines, secondary valve humped with longer spines on the humpe; further both valves possess along the margins a wreath of parallel, straight apiculi.

10 (r).

Area: Yeddo Bay.

Biddulphieae.

Schmidtiella Ostf. n. gen.

Frustules in chains. Valves broadly elliptic with undulate surface, most elevated at the sagittal plane, cohering one to another by two minute processes at the sagittal plane. Frustules in a front-view rectangular. No structure seen. Endochrome cocochromatic.

Allied to *Graya* Brun & Grove [see Van Heurck, A Treatise on the Diatomaceae p. 458, f. 187] and perhaps forming a connection between the *Chaetoceraceae* and the *Biddulphieae*.

62. *S. pelagica* Ostf. n. sp.

Characters of the genus, frustules in front view 80 μ broad, in sagittal view 40 μ broad.

I have only found one chain of this interesting diatom which I name in honour of the Danish botanist Johs. Schmidt who made those rich collections in Siam which he is publishing in the "Flora of Koh Chang".

Eucampia Ehbg.

63. *E. biconcava* (Cl.) Ostf. ms.; *Climacodium biconcarum* Cleve, Phytoplankton p. 22, Pl. 2, f. 16, 17; Atl. Plankt. Organisms p. 314; Pl. f. the Red Sea, p. 1033; Pl. f. the Indian Ocean and the Malay Archip. p. 19; *Eucampia hemiauloides* Ostf. in Ostenfeld & Schmidt, Pl. f. the Red Sea p. 157, f. 9.

According to a letter from Mr. Cleve his *Climacodium biconcarum* is identical with my *Eucampia hemiauloides*, and consequently his species-name has the priority, but as shown in my paper it must be an *Eucampia*, with the same structure as the other species of this genus.

2 (r) — 3 (rr) — 4 (rr) — 5 (rr) — 6 (rr) — 7 (r) — 10 (rr).

Area: Tropical Atlantic Ocean, Mediterranean, Red Sea, Gulf of Aden, Malay Archipelago.

64. *E. cornuta* (Cl.) Grun. in Van Heurck, Synopsis Pl. 95 bis, f. 5; Cleve, Pl. f. the Red Sea p. 1033, Pl. f. the Indian Ocean and the Malay Archip. p. 21; (?) Atl. Plankt. Organisms p. 326; *Mölleria cornuta* Cleve, Diat f. the Sea of Java 1873, p. 7, Pl. 1, f. 6; Leuduger-Fortmorel, l. c. p. 47.

6 (rr) — 10 (r).

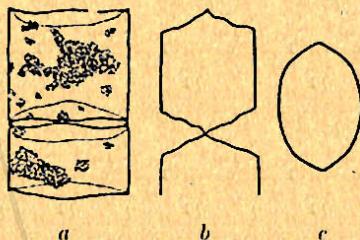

Fig. 20. *Schmidtiella pelagica* Ostf.
a chain of two cells in front view, b in
sagittal view, c cell in side view ($\frac{200}{1}$).

Area: Red Sea, Malay Archipelago; a very small form occurs in the sub-tropical N. Atlantic Ocean (Cleve).

65. *E. zodiacus* Ehbg., Kreideth. p. 71, Pl. 4, f. 8; Leuduger-Fortmorel, l. c. p. 40; Cleve, Diat. f. the Sea of Java p. 7; Atlant. Plankt. Organisms p. 326; Pl. f. the Ind. Ocean and the Malay Archip. p. 21.
10 (rr).

Area: Neritic species found along the coasts of West-Europe, Malay Archipelago, Yeddo Bay in Japan, Puget's Sound.

Climacodium Grun.

66. *C. Fraunfeldianum* Grun., Novara Exp. 1870, 102, Pl. I A, f. 24; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 156; Cleve, Atlant. Plankton Organisms p. 314; *C. Fraunfeldii* Cleve, Pl. f. the Red Sea, p. 1033; Cleve, Pl. f. the Ind. Ocean and the Malay Archipelago p. 19; *C. Jacobi* Cleve, Phytoplankton p. 22, Pl. 2, f. 18; *Climacidium Fraunfeldii* Van Heurck, Synopsis Pl. 106, f. 5.

2 (rr) — 3 (rr) — 7 (rr) — 10 (rr).

Area: Tropical Atlantic Ocean, Red Sea, Indian Ocean, Malay Archipelago, Pacific Ocean.

Streptotheca Cleve.

67. *S. thamensis* Cleve in Shrubsole, Journ. Quckett Microsc. Club, 1890, IV, n. s. p. 259, Pl. 13, f. 4—6; Phytoplankton p. 25, Pl. 2, f. 19; Atl. Plankt. Organisms p. 353; Van Heurck, Treatise on the Diatomaceae p. 463, f. 194; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 161; *S. maxima* Cleve, Pl. f. the Indian Ocean and the Malay Archip. p. 23 and p. 57, Pl. 8, f. 5.

I am unable to see any difference of specific value between the North Sea species and the *S. maxima* described by Cleve from the Malay Archipelago, but the details given by Cleve indicate the correctness of Van Heurck in placing the genus in the neighbourhood of *Climacodium* and *Eucampia*.

2 (r) — 3 (+) — 4 (rr) — 6 (rr).

Area: Along the coasts of West Europe, N. Atlantic Ocean (rare), Red Sea, Malay Archipelago.

Ditylium Bail.

68. *D. Sol* (Van Heurck) Leuduger-Fortmorel, l. c. p. 39; De Toni, Sylloge Algarum, Vol. II, p. 1018; Cleve, Atl. Plankt. Organisms p. 325; Pl. f. the Indian Ocean and the Malay Archip. p. 21; *Triceratium Sol* Van Heurck, Synopsis Pl. 115, f. 1 (1881); A. Schmidt, Atlas d. Diatom. Kunde Pl. 152, f. 4, 5, 7-9.

2 (r) — 3 (c) — 5 (rr) — 6 (rr) — 7 (rr).

Area: Atlantic Ocean at 10° N. 53° W., Gulf of Bengal, Malay Archipelago, China Sea.

Biddulphia Gray.

69. *B. chinensis* Grev., Trans. Microsc. Soc. 1866, p. 81, Pl. 9, f. 16; Leuduger-Fortmorel, l. c. p. 39; Cleve, Diat. f. the Sea of Java 1873, p. 6; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 152, f. 6; A. Schmidt, Atlas der Diat. Kunde Pl. 122, f. 22—24.

I have given figures of this species and of the following showing the different direction of the processes and the spines.

3 (+) — 5 (rr) — 10 (rr).

Area: Red Sea, Malay Archipelago, South China Sea.

70. *B. mobilensis* Bail., Am. Journ. Sc. 1845, p. 336, Pl. 4, f. 24; Van Heurck, Synopsis Pl. 101, f. 4, Pl. 103, f. A; Cleve, Atlant. Plankt. Organisms, p. 288; Schröder, Neapel p. 30; *B. Baileyi* Smith, Brit. Diat. II, p. 50, Pl. 45, f. 322, Pl. 62, f. 322; Leuduger-Fortmorel, l. c. p. 38; *Denticella mobilensis* Grun., de Wildeman, l. c. p. 127.

2 (r) — 3 (rr) — 4 (rr) — 5 (rr) — 6 (rr).

Area: Along the Coasts of West-Europe and North-America, Mediterranean, Indian Ocean, Malay Archipelago, Pacific Ocean. Neritic species.

Cerataulina Perag.

71. *C. Bergonii* Perag., Monogr. du genre Rhizosolenia, Le Diatomiste vol. I, p. 103, Pl. 1, f. 15, 16; Schröder, Neapel p. 20 (var. *elongata*); Cleve, Bilh. t. Sv. Vet. Akad. Handl. Bd. 20, 3, 1894, No. 2, p. 11, Pl. 1, f. 6; Atl. Plankt. Organisms p. 288, Pl. f. the Red Sea, p. 1032; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 152; *Zygoceros* (?) *pelagicum* Cleve, Kanonbaaden, Hauch's Tøgter, Kjöbenhavn (1889), p. 54.

6 (rr) — 10 (rr).

Area: Temperate N. Atlantic Ocean, Mediterranean, Red Sea, Gulf of Aden.

72. *C. compacta* Ostf. in Ostenfeld & Schmidt, Pl. f. the Red Sea, 1901, p. 153, f. 7; *Rhizosolenia* (*Guinardia*?) *recta* Cleve, Pl. f. the Indian Ocean and the Malay Archipelago 1902, p. 23 and p. 57, Pl. VIII, f. 7 a, b.

Fig. 21.
*Biddulphia
chinensis* Grev.
($\frac{222}{1}$).

Fig. 22.
*Biddulphia
mobilensis* Bail.
($\frac{222}{1}$).

There is no doubt that this species having two processes on each valve belongs to the genus *Cerataulina*, and Cleve has also indicated two in his figure 7a, so that I do not understand his reasons for taking it as a *Rhizosolenia*.

2 (rr) — 3 (+).

Area: Red Sea, Malay Archipelago.

Hemiaulus Ehbg.

73. *H. chinensis* Grev. Ann. Magaz. Nat. Hist. XVI, p. 5, Pl. 5, f. 9. 1865; *H. Heibergii* Cleve, Diat. f. the Sea of Java, 1873, p. 6, Pl. 1, f. 7; Leudiger-Fortmirel, l. c. p. 41; Cleve, Pl. f. the Red Sea, p. 1033; Pl. f. the Indian Ocean and the Malay Archip. p. 21; Atl. Plankton Organisms p. 329.

Professor Cleve informs me in a letter that his *H. Heibergii* is identical with *H. chinensis* of Greville.

6 (rr) — 10 (+).

Area: Tropical Atlantic Ocean, Red Sea, Indian Ocean, Malay Archipelago, Arafura Sea, Japan and China Seas.

B. *Pennatae.*

Fragilarieae.

Thalassiothrix Cleve & Grun.

74. *T. Fraunfeldii* Grun. in Cleve & Grunow, Arctische Diatomeen, K. Sv. Vet. Akad. 17, No. 2, 1880, p. 109; de Wildeman, l. c. p. 104; Castracane, Challenger Report p. 54—55, Pl. XIV, f. 7, 8 (incl. *T. currata* Gastr., Pl. XXIV, f. 6); Schröder, Neapel p. 31; Cleve, Phytoplankton p. 25; Atl. Plankt. Organisms p. 356; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 162; Van Heurck, Synopsis Pl. 37, f. 11—15; *Asterionella Fraunfeldii* Grunow, Verh. zool.-bot. Gesellsch. Wien 1863, p. 140, Pl. 14, f. 18; Cleve, Diatoms of the Sea of Java 1873, p. 12.

I should think that all the specimens belong to the var. *jaramica* Grun. in Van Heurck, l. c. f. 13.

1 (+) — 2 (r) — 3 (rr) — 6 (r) — 7 (r) — 10 (+).

Area: Atlantic Ocean, Mediterranean, Red Sea, Indian Ocean, Malay Archipelago, China Sea, Japan Sea, Pacific Ocean.

75. *T. longissima* Cleve & Grunow, l. c. p. 108; Ostenfeld & Schmidt, Pl. f. the Red Sea, etc. p. 162 (f. *gracilis* Ostf.); Cleve, Phytoplankton p. 25; Atl. Plankt. Organisms p. 357; Pl. f. the S. Atlantic and the S. Indian Ocean p. 935; Pl. f. the Red Sea, p. 1035; Pl. f. the Indian Ocean

and the Malay Archip. p. 24; *Synedra Thalassiothrix* Cleve, Bih. K. Sv. Vet. Akad. Handl. 1, Nr. 13, p. 22, Pl. 4, f. 24; *Synedra* sp., Chun, Aus den Tiefen des Weltmeeres, Jena 1900, p. 206, f. 2, 3.

Most of the present specimens are very delicate (f. *gracilis* Ostf.), but also the main species has been met with.

2 (rr) — 4 (rr) — 6 (r) — 7 (rr) — 10 (+).

Area: Arctic and Northern Atlantic Ocean (especially in the Irminger Sea), Antarctic Ocean from 20° W. to 91° E., Red Sea, Gulf of Aden, Indian Ocean from c. 40° S. to 45° S., Malay Archipelago, Bering Sea. It is a bipolar species which often predominates in the samples from the Subarctic regions.

Naviculeae.

Navicula Bory.

76. *N. membranacea* Cleve, Phytoplankton 1897, p. 24, Pl. II, f. 25-28; Pl. f. the Red Sea p. 1033; Atl. Plankt. Organisms p. 333; Pl. f. the Indian Sea and the Malay Archipelago p. 22; Lemmermann l. c. p. 315.

As supplement to the figures by Cleve (Phytoplankton) I have given two figures of a frustule in valvular and in zonal view. No structure visible.

2 (rr) — 3 (rr) — 6 (rr) — 10 (rr).

Area: Subtropical Atlantic Ocean (rare), Red Sea, Malay Archipelago, Cook Strasse at New Zealand.

Nitzschiaeae.

Nitzschia Hass.

77. *N. serata* Cleve, Diat. of Vega, Vega-exped. vetensk. iakttagelser Pl. 38, f. 75; Atl. Plankt. Organisms p. 335; *N. fraudulenta* Cleve, Fish. Board f. Scotland 1896, p. 300, Pl. 1, f. 11; Pl. f. the Indian Ocean and the Malay Archip. p. 22; Schröder, Neapel p. 32.

1 (rr) — 2 (rr) — 6 (rr) — 10 (rr).

Area: Arctic Ocean, Northern Atlantic Ocean southwards to Azores, Mediterranean, Malay Archipelago.

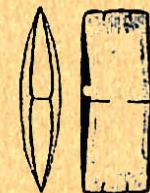

Fig. 23. *Navicula membranacea* Cl.
Side view and front view ($\frac{200}{1}$).

Freshwater Diatoms

by E. Østrup — Copenhagen.

(With plate I.)

The following list of freshwater Diatoms has resulted from the examination of 33 samples collected by the Danish expedition to Siam (1899—1900). Of these 33 samples two only contained no Diatoms; the localities of the remaining 31 samples are:

Koh Chang: Klong Son	2 samples
" Lem Dan	16 "
" Klong Munsé	5 "
" Klong Majum	2 "
" Klong Prao	1 "
" Klong Sarlakpet	1 "
Naval station opposite Koh Kong ...	1 "
Koh Samit	1 "
Lem Ngo ^b	2 "

Total... 31 samples.

Placochromaticæ.

Caloneis Cl., Syn. I, p. 46.

1. *C. fasciata* Lgst.? tab. 1. ostr., fig. 1.

L. 0,028 mm., B. 0,006 mm., striae in the middle at least 25 in 0,01 mm., denser towards the apices.

Striae radiate. The apical area dilated towards the middle and here forming a transapical fascia.

Solitary in a sample from Lem Dan.

With some doubt I have referred this small form to *Cal. fasc.* Lgst. because the striae are more radiate and because I am not sure, that I have seen the longitudinal lines.

Area: *Cal. fasc.*: ubiquitous.

***Neidium* Pfitzer (1871), Cl. Syn. I, p. 67.**

2. ***N. affine* Ehr. var. *genuina* Cl. forma *minor*.** A. S. Atl. tab. XLIX, fig. 23.

Lem Dan (7 samples).

Area: the main species: ubiquitous, f. *minor*; Spitzbergen, Europe, Australia.

3. ***N. Hitchcockii* Ehr.** A. S. Atl. tab. XLIX, figs. 35—36.

Klong Son, Lem Dan (7 samples).

Usually with oblique striae, forming an angle of about 75° to the apical axis.

Area: North America, Europe, Bengal, Australia, New Zealand.

***Frustulia* Ag. (1824), Cl. Syn. I, p. 121.**

4. ***F. rhomboides* Ehr.** V. H. Syn. tab. XVII, figs. 1—2.

Found in many (20) of the samples. In some of them e. g. from Klong Munsé and Lem Dan not rare.

var. *saxonica* Rabh. V. H. l. c. fig. 4.

Mixed with the main species.

Area: the main species and the var. *saxonica*: America, Europe, Asia, Australia.

***Stauroneis* Ehr. (1843); cnfr. Cl. Syn. I, p. 141 *Nariculae microstigmaticaæ*.**

5. ***Stauroneis anceps* Ehr. var. *hyalina* Br. & Perag.** Hérib. Diat. Auv. tab. III, fig. 19.

Solitary in two samples from Lem Dan and Lem Ngob.

Area: Europe (fossil), Australia.

In a sample from Lem Dan I have found a *Stauroneis*, in its outward form like *St. anc.* Ehr. var. *amphicephala* Ktz. (V. H. Syn. tab. IV, fig. 5) but without any visible striae.

***Cymbella* Ag. (1830), Cl. Syn. I, p. 156.**

6. ***C. gracilis* Rabh. cnfr. A. S. Atl. tab. X, fig. 39; tab. nost., fig. 3.**

Klong Prao, Klong Majum, Klong Munsé, Lem Dan.

I have figured this form because it differs somewhat from the type by its gibbous ventral margin.

Area: *Cymb. grac.*: Greenland, Europe, Tasmania, New Zealand; according to Cleve (l. c. p. 169) especially in alpine regions.

7. ***C. japonica* Reichelt.** Kunze Rev. III, p. 391.

Klong Prao, Klong Majum, Klong Munsé, Klong Son, Lem Dan. (7 samples).

Area: Japan.

Gomphonema Ag. (1824), Cl. Syn. I, p. 178.

8. **G. parvulum** Ktz. V. H. Syn. tab. XXV, fig. 7.

Klong Sarlakpet.

- var. **micropus** Ktz. V. H. l. c. figs. 4—5.

Klong Majum, Lem D.-n.

Area: the main species ubiquitous, var. *micropus*; Europe, America.

Obs. In a sample from Lem Dan I found specimens of *G. parvulum*, which are nearest to var. *subcapitata* (V. H. l. c. fig. 11), but proportionately broader. In V. H.'s figure the rate between length and breadth is 13:3; in the present form it is 14:5.

9. **G. gracile** Ehr. forma **major** V. H. Syn. tab. XXIV, fig. 12.

- var. **naviculoides** (W. Sm.) Grun. V. H. l. c. figs. 13—14.

Klong Prao, Klong Munsé, Klong Son, Koh Samit, Lem Dan. (15 samples.)

Area: Europe, America, Java, New Zealand.

10. **G. entolejum** Öst. sp. nov. tab. nost. fig. 4.

L. up to 0,065 mm., B. up to 0,01 mm. Striae 10 in 0,01 mm.

Stiae short, marginal. Unilateral stigma present, but hardly visible. By its marginal striae and consequently large area this very characteristic species reminds of *G. Brasiliense* Grun. (V. H., Syn. tab. XXV, fig. 17) and *G. Puiggarianum* Grun. (V. H., l. c. fig. 18) and perhaps it might be considered an intermediate form between those two species, provided they also possessed an unilateral stigma. But as this is discernible only with difficulty in *G. entolejum*, its presence in the two mentioned species is still conceivable.

Klong Prao, Klong Munsé, Klong Majum, Klong Sarlakpet. (5 samples).

In some of these samples not rare.

Anomoeoneis Pfitzer (1871) Cl. Syn. II, p. 5.

11. **A. brachysira** (Bréb.) Grun. V. H. Syn. tab. XII, figs. 8—9.

Klong Prao, Klong Son, Klong Munsé, Lem Dan. (9 samples).

Area: Greenland, Europe.

12. **A. exilis** (Ktz.) Grun. V. H. Syn. tab. XII, fig. 11.

Lem Dan (4 samples).

Area: Greenland, Europe.

Navicula Bory (1822).

Orthostichæ Cl. Syn. I, p. 107.

13. **N. cuspidata** Ktz. var. **lanceolata** Grun. enfr. O. Müll. El Kab tab. XII, fig. 18; tab. nostr., fig. 2.

L. 0,04 mm., B. 0,007 mm.

Valve narrow lanceolate, attenuated towards the apices. Central pores distant. Striae fine, at right angles to the apical axis. By slighter enlargement the striation, especially in the central part presents an irregular longitudinal undulation, nearly as in *Anomooneis*.

This form probably must be referred to *N. cusp.*; it is nearest to var. *lanceolata*.

Solitary in two samples from Klong Prao and Lem Dan.

Area: *Nar. cusp. lanc.*: El Kab.

14. *N. Stodderi* Greenl. var. *Insignis* Grun. Cl. Syn. I, tab. III, fig. 13.

Solitary in two samples from Lem Dan.

Area: Bengal.

Mesolejae Cl. Syn. I, p. 127.

15. *N. Pupula* Ktz. V. H. Syn. tab. XIII, figs. 15—16.

Lem Dan (7 samples).

Area: ubiquitous.

Bacillares Cl. Syn. I, p. 136.

16. *N. Pseudobacillum* Grun. V. H. Syn. tab. XIII, fig. 9.

Solitary in a sample from Lem Dan.

Area: Europe, Japan, Australia, New Zealand.

Lineolatae Cl. Syn. II, p. 10.

17. *N. cryptocephala* Ktz. var. *exillis* Ktz. V. H. Syn. tab. VIII, fig. 2.

Lem Dan (3 samples).

Area: Europe.

18. *N. radios* Ktz. var. *tenella* Bréb. V. H. Syn. tab. VII, figs. 21—22.

Klong Majum, Klong Satlakpet, Lem Dan. (5 samples).

Area: Greenland, America, Europe, Japan, Tasmania, Australia.

19. *N. cineta* Ehr. var. *siamensis* Öst. var. nov. tab. nostr., fig. 5.

L. 0,036—0,05 mm., B. 0,005—0,007 mm., striae 20 in 0,01 mm., finely transversely lined.

Valve narrow lanceolate, somewhat attenuated towards the apices. Striae in the middle radiate, alternately longer and shorter, towards the apices convergent. Central area narrow.

Klong Majum, Lem Dan.

I have considered this form a variant of *N. cineta* Ehr., although it differs somewhat in its outline and in its closer striae. Possibly it is nearer to *N. Bottnica* Grun. (V. H. Syn. tab. VII, fig. 33).

Lævistriatæ Cl. Syn. II, p. 66.

20. **N. Yarrensis** Grun. A. S. Atl. tab. XLVI, fig. 2. tab. nostr. fig. 6.

Lem Dan (5 samples).

Only in one of the samples a single specimen of this species agreeing with the figure by A. S. (l. c.) has been met with. Smaller forms agreeing tolerably well with those from V. Heurck's types No. 542 (from Yarra-Yarra, fossil) only with their apices a little more attenuated and thus reminding of the variety „simbirskiana“ (Pant. II, tab. XII, fig. 16) are much more common in the collection.

Area: Europe (Kiel), Hungary (fossil). America, Africa, Asia, Australia.

21. **N. bicontracta** Öst. sp. nov. tab. nostr. fig. 7.

L. 0,028 mm., B. in the middle 0,0085 mm., at the constriction 0,0055 mm. Striae 12—13 in 0,01 mm.

Valvæ biconstricted, with greatest breadth in the middle and with cuneate apices. Striae radiate in the middle with a single short stria inserted, towards the apices at right angle to and nearly reaching the apical axis. Central area narrow, apices slightly curved.

The systematical place of this small species is doubtful. Perhaps it is related to a „fragliche Form“ from New Jersey in A. S. Atl. tab. CCXII, fig. 2, which seems to approach to *Caloneis Egena* A. S. (Cl. Syn. I, p. 66). As I think I have seen a slight trace of a transversal lineation of the striae, I dare not refer it to „*Pinnularia*“.

Lem Ngob. Only one specimen met with.

Pinnularia Ehr. (1843), Cl. Syn. II, p. 71.

Capitatae Cl. l. c. p. 75.

22. **P. Kraunii** Grun. V. H. Syn. tab. VI, fig. 21. A. S. Atl. tab. XLV, figs. 77—78.

Naval station, Lem Dan, Lem Ngob. (9 samples).

Rather variable, especially in size. The greatest length observed by me is 0,086 mm.

Area: Europe, America, Bengal, Australia.

23. **P. interrupta** W. Sm. A. S. Atl. tab. XLV, fig. 70.

Klong Munsé.

Area: Europe, America, Asia, Australia.

24. **P. microstauron** Ehr. V. H. Syn. tab. VI, fig. 9. A. S. Atl. tab. XLIV, fig. 35.

Lem Dan, Lem Ngob.

Area: Spitzbergen, Greenland, Kamtschatka, Europe, N. America, Australia.

Divergentes Cl. l. c. p. 77.

25. **P. divergentissima** Grun. V. H. Syn. tab. VI, fig. 32.

Solitary in two samples from Lem Dan.

Area: Spitzbergen, Greenland, N. Europe, Canada, New Zealand. According to Cleve (l. c. p. 77) an arctic and alpine species.

26. **P. divergens** W. Sm. var. **elliptica** Grun. Grun., Fz. Jos. Land tab. I, fig. 19.

Solitary in a sample from Lem Dan.

Area: Franz Joseph-Land, Greenland, Europe, America, Africa, Australia.

Tabellarieæ Cl. II, p. 81.

27. **P. stauroptera** Grun. Donk., Brit. Diat. tab. XII, fig. 3.

Klong Prao, Klong Son, Koh Samit, Lem Dan. (6 samples).

var. **interrupta** Cl. V. H. Syn. tab. VI, figs. 6—7.

Lem Dan.

Area: the main species: Europe, America, Australia. var. *interrupta*: Franz Josef-Land, Europe, America, New Zealand, Hawaii.

28. **P. stomatophora** Grun. var. **ornata** A. Cl. A. Cl. Lule Lappm.; fig. 3.

Solitary in two samples from Lem Dan and Koh Samit.

The present form is somewhat larger than that figured by A. Cleve.

Area: Lule Lappmark.

Brevistriatae Cl. l. c. p. 85.

29. **P. brevicostata** Cl. A. S. Atl. tab. XLIII, figs. 26—27.

Lem Dan, Koh Samit.

Area: Europe, Bengal.

30. **P. parva** (Ehr.) Grun. A. S. Atl. tab. XLIII, fig. 21.

Lem Ngob.

Area: Europe, America, Java, Australia, New Zealand.

Complexæ Cl. l. c. p. 91.

31. **P. viridis** Nitzsch. A. S. Atl. tab. XLII, fig. 14.

Lem Dan (4 samples).

var. **intermedia** Cl. A. S. Atl. tab. XLII, fig. 9.

Lem Dan.

Area: the main species ubiquitous. var. *intermedia*: Europe, Congo, Java, Australia.

32. *Pinnularia* sp. tab. nostr., fig. 8.

L. 0,049 mm., B. 0,01 mm. Striae 10 in 0,01 mm.

Valve rectilinear with rounded apices. Terminal fissures comma-shaped. Apical area narrow. Striae parallel, at right angles to the apical axis, absent in the middle, so that a transapical area arises.

As I have seen but one specimen of this small form, I dare not regard it as a distinct species. It seems to be nearest to *Pinn. macilenta* (Ehr.) Cl.

Amphora Ehr. (1840). Cl. Syn. II, p. 99.33. *A. acutiuscula* Ktz. V. H. Syn. tab. I, fig. 18.

Solitary in a sample from Lem Dan.

Area: Greenland, Spitzbergen, Europe, Madeira, New Zealand, Samoa.

Achnanthes Cl. Syn. II, p. 163.*Actinoneis* Cl. l. c. p. 185.34. *A. oblongella* Öst. nov. sp. tab. nostr., fig. 9.

L. 0,057 mm., B. 0,006 mm.

Epitheca: apical area narrow, 10 striae in 0,01 mm., finely transversely lineated. Hypotheca: striae very fine, slightly curved. Central area narrow.

Hypotheca of this small species highly reminds of *Naricula Rotaeana* Grun. var. *oblongella* Grun. (V. H., Syn. tab. XIV, fig. 21). But as I have seen both valves in situ, I am quite sure it is an *Achnanthes*.

Klong Majum.

In the same sample where *Ach. oblongella* occurs I found a small form, which I have figured in tab. nostr., fig. 10.

Valve oblong elliptical, L. 0,018 mm., B. 0,007 mm., striae 10 in 0,01 mm., somewhat shortened so that an apical area arises. In specimens mounted in styrax it was impossible to see any raphe, but in a dry specimen I could catch a glimpse of a such one with distant central pores. As to the structure of the valve all the specimens examined were identical. Thus I dare not decide if the present form is an *Achnanthes*, or a *Naricula*.

Microneis Cl. l. c. II, p. 187.35. *A. minutissima* Ktz. V. H. Syn. tab. XXVII, figs. 37—38.

Klong Majum, Klong Munsé, Lem Dan. (4 samples).

var. *cryptocephala* Grun. V. H. l. c. figs. 41—44.

Klong Prao, Klong Munsé, Lem Dan.

Area: the main species: Greenland, Europa, Mongolia. var. *cryptocephala* according to Cleve (l. c. p. 188) Finland. I have found it in the Ferö Islands and in Denmark.

36. *A. microcephala* Ktz. V. H. Syn. tab. XXVII, figs. 20—23.

Klong Majum.

Area: Europe, Bandong.

37. *A. linearis* W. Sm. V. H. Syn. tab. XXVII, figs. 31—32.

Klong Majum, Klong Munsé, Lem Dan. (5 samples.)

— — — var. *pusilla* Grun. V. H. l. c. figs. 33—34.

Klong Majum.

Area: the main species: Europe, var. *pusilla*; also in Greenland.

38. *A. exilis* Ktz. V. H. Syn. tab. XXVII, figs. 16—19.

Klong Majum (two samples).

Area: Europe, Abyssinia.

39. *A. affinis* Grun. V. H. Syn. tab. XXVII, figs. 39—40.

Klong Majum, Klong Munsé.

Area: Europe, America, Tasmania.

Achmanthidium Cl. l. c. p. 191.

40. *A. rostrata* Öst. n. sp. tab. nostr., fig. 11.

L. 0,012 mm., B. 0,006 mm. Striae 10 in 0,01 mm. The outline of both valve identical: elliptical with rostrate apices. Epitheca with an unilateral horseshoe-shaped mark, Hypotheca: central pores approximate, unilateral central area.

This small species is obviously nearest to *A. lanceolata* (Bréb.) Grun. var. *dubia* Grun. (V. H. Syn. tab. XXVII, figs. 12—13).

Klong Sarlakpet.

41. *A. baccata* Leud.-Fortm. Cl. Syn. II, tab. III, fig. 3. Leud.-Fortm. Ceylon tab. I, fig. 5.

In a slide from Klong Prao I found a specimen thus situated, that it was quite agreeing with the figure by L.-F. quoted above, which is referred with some doubt to *A. baccata* by P. T. Cleve (l. c. p. 195).

Klong Prao, Klong Majum, Klong Sarlakpet, only in samples labelled: „in waterfall“.

Area: Ceylon.

Epithemia Bréb. (1838). V. H. Traité p. 294.

42. *E. Argus* (Ehr.) Ktz. var.

Klong Prao, Klong Majum. Rare.

As the present form differs from the type by its pronounced curvature I have figured it in tab. nostr., fig. 12.

Area: the main species: Europe, Java.

43. *E. gibberula* (Ehr.?) Ktz. var. *producta* Grun. V. H. Syn. tab. XXXII, fig. 12.

Solitary in a sample from Lem Dan.

Area: the main species, Europe, America, Java. var. *producta*: according to de Toni (Syll. p. 786) „cum specie hinc et inde“.

Eunotia Ehr. (1837). V. H. Traité p. 298.

44. **E. major** (W. Sm.) Rabh. var. *octoundulata* Grun. Grun. Banka, tab. I, fig. 8.

Lem Dan (two samples).

Area: Banca.

45. **E. parallelo** Ehr. Grun. Banka tab. I, fig. 3 a.

Lem Dan.

forma *angustior* V. H. Syn. tab. XXXIV, fig. 16.

Lem Dan.

Area: Greenland, Europe, America, Banca.

46. **E. pectinallis** (Ktz.) Rabh. var. *stricta* Rabh. V. H. Syn. tab. XXXIII, fig. 18.

Lem Dan (3 samples).

var. ? *minor* (Ktz.) Rabh. V. H. l. c. figs. 20—21.

Klong Son, Lem Dan (5 samples).

forma *curta*. V. H. l. c. fig. 15.

Lem Dan.

Area: Europe, America.

var. *undulata* (Rübs) Rabh. in Grun. Banka, p. 4, tab. I, figs. 5 a—e.

Lem Dan (11 samples).

I found forms agreeing with the figures by Grunow quoted above and with W. Sm. Syn. tab. XXXIII, fig. 281 a, but not with V. H. Syn. tab. XXXIII, fig. 17.

Area: England, Banca.

47. **E. prærupta** Ehr. var. *bidens* Grun. enfr. V. H. Syn. tab. XXXIV, fig. 20.

Lem Ngob.

Only one small specimen observed (L. 0,04 mm.), in its shape quite agreeing with the quoted fig. by V. H., but I was not able to see any sculpture on its striæ.

Area: Type arctic and alpine.

48. **E. robusta** Ralfs var. *bigibba* Öst. var. nov. tab. nost., fig. 13.

L. 0,06 mm., striæ along the ventral margin 10 in number in 0,01 mm., towards the apices closer, finely transversely lineated. Terminal nodi somewhat removed from the apices.

Klong Majum, Klong Munsé. (3 samples).

With hesitation I regard this form as a variant of *E. robusta*. It is not identical with *E. rob. Papilio*, nor with *E. Diodon* as far as I can judge.

49. *E. Diodon* Ehr. forma *minor* V. H. Syn. tab. XXXIII, fig. 5.

Lem Dan.

Area: the main species: Europe.

50. *E. lunaris* (Ehr.) Grun. var.? *alpina* (Nægeli) Grun. V. H. Syn. tab. XXXV, fig. 5. Grun. Banka tab. I, fig. 9.

Klong Munsé, Klong Son, Koh Samit, Lem Dan. (6 samples.)

Area: Europe, India, Java, Banca.

51. *E. Camelus* Ehr. *genuina* Grun. Grun. Banka tab. I, figs. 6 a and b.

var. *denticulata* Grun. Grun. I. e. fig. 6 d.

Lem Dan (7 samples).

Area: Europe, America, Banca.

52. *E. costata* Öst. nov. sp. tab. nostr., fig. 14.

L. up to 0,09 mm., B. up to 0,007 mm., costæ 5 in 0,01 mm. Valve arcuate with parallel dorsal- and ventral margin, terminal nodi on the ventral side, a little removed from the rounded apices. Costæ prominent forming denticuli on the dorsal margin. The frustule rectangular with finely striated connecting zone.

Klong Prao, Klong Majum, Klong Munsé, Klöng Son, Koh Samit, Lem Dan. (8 samples). Not common in any sample.

Desmogonium Ehr. (1848). Grun. Banka p. 5.

53. *D. Rabenhorstianum* Grun. Grun. Banka tab. I, fig. 1.

Lem Dan (3 samples).

Area: China, Banca.

var. *crassa* Öst. var. nov. tab. nostr., fig. 15.

L. 0,1 mm., B. 0,008 mm. Striae 14—16 in 0,01 mm. Denticuli 7—8 in 0,01 mm.

Naval Station, Lem Dan (3 samples).

Shorter and broader than the type. Apices somewhat inflated.

Synedra Ehr. (1831). V. H. Traité p. 307.

54. *S. Ulna* (Nitzsch) Ehr. V. H. Syn. tab. XXXVIII, figs. 9, 12 and 14.

Klong Prao, Klong Majum, Klong Munsé, Klong Sarlakpet, Lem Dan. (7 samples).

In some of the samples not rare.

Varies somewhat (but with connecting forms), usually the apices are more capitate than figured by V. H. l. c.

Area: Europe, America, Java.

In a sample from Klong Prao there occurs a smaller, slightly curved form (L. 0,074 mm., B. 0,005 mm., striae 9 in 0,01 mm.) with unilateral central area which is nearest to var. *amphirhynchus* (V. H. l. c. fig. 5). I have figured it in tab. nostr., fig. 16.

***Surirella* Turpin (1827).** V. H. Traité p. 368.

55. *S. linearis* W. Sm. var. *constricta* W. Sm.? empr. A. S. Atl. tab. XXIII, fig. 8.

L. 0,09 mm., B. in the middle 0,014 mm., costæ 2—3 in 0,01 mm.

Klong Munsé, Lem Dan. Rare.

As the present form differs somewhat from the above fig. by A. S. I have figured it in tab. nostr., fig. 17.

Area: the main species scattered, usually in alpine and subalpine regions; var. *constricta*: *cum specie passim* (de Toni Syll. p. 568).

56. *S. angusta* Ktz.? A. S. Atl. tab. XXIII, fig. 40.

Klong Prao, Klong Majum.

This form agrees with the figure by A. S. which has been referred by him with some doubt to *S. angusta*.

Area: Europe.

57. *S. slamensis* Öst. nov. sp. tab. nostr., fig. 18.

L. 0,026 mm., B. 0,01 mm., costæ 4 in 0,01 mm. Valve oval, costæ alternant, reaching the apical axis, striae fine.

Solitary in a sample from Lem Dan.

This *Surirella* seems to me, in spite of its small size, to approach most closely to *S. bifrons* Ktz.

***Hantzschia* Grun. (1877).** V. H. Traité p. 380.

58. *H. amphioxys* (Ehr.) Grun. V. H. Syn. tab. LVI, fig. 1.

Solitary in a sample from Lem Dan.

Area: Ubiquitous.

68. **C. Meneghiniana** Ktz. A. S. Atl. tab. CCXXII, fig. 25.

Solitary in a sample from Lem Dan.

Area: Europe.

Coscinodiscus Ehr. (1838). V. H. Traité p. 525.

69. **C. lacustris** Grun. var. **australiensis** Grun. Grun. Fz. Joseph-L. tab. IV, fig. 31.

Lem Dan.

Area: China, Australia.

The material examined by me is not particularly rich neither in individuals nor in species and a few samples only make an exception from this. More important genera are: *Frustulia*, *Gomphonema*, *Ervotia*, in some samples also *Synedra*.

In samples from inland waterfalls in Koh Chang I especially found small *Achnanthes* and *Cymbella gracilis* var., then *Synedra* and *Eunotia*.

In samples from riverbeds or pools *Anomoconeis exilis* is predominant.

The samples from ricefields at Lem Dan are distinguished by containing some forms usually belonging to brackish water viz. *Navicula Yarrensis*, *Nitzschia scalaris* var., *Nitzschia Tryblionella* var. and *Coscinodiscus lacustris australiensis*. The two *Nitzschia* however may also be met with in freshwater. Also two marine forms have been found in the same samples viz. *Amphora acutiuscula* and *Nitzschia longissima*. As the shallow ricefields at Lem Dan are situated close upon the seacoast it is fairly explicable that such forms belonging to brackish water (and even a few marine forms) occur in the freshwater collections, but on the other hand is the presence of *Achnanthes baccata*, which I have only seen in samples from waterfalls, more difficult to understand. This species is pre-

viously known only from Ceylon where Leuduger-Fortmorel has found it in a sample „recueillie . . . sur l'ancre d'un navire mouillé, par huit brasses d'eau, à Colombo, sur les côtes de Ceylan“. Certainly there is nothing to prevent that, at Colombo it might have been carried out into the sea with freshwater; however the whole habit of this species does not at all agree with *Achnantheae* from freshwater, but much more with marine forms such as *Ach. brevipes*. Perhaps the examination of the marine Diatoms collected by the Danish Expedition will prove that it also occurs in the Gulf of Siam, but its presence in elevated inland waterfalls is nevertheless very strange.

As to the general character of the flora so far as we can judge from the present samples of freshwater Diatoms, we must say that it is less pronounced by the present than by the wanting forms. Most of the species observed occur scattered round the world, a few have previously been recorded only from more adjacent localities e. g. *Navicula Stodderi* (Bengal), *Stauroneis anceps hyalina* (Australia), *Cymbella japonica* (Japan), *Eunotia major octoundulata* (Banca), *Desmogonium Rabenhorstianum* (Banca and China), *Denticula Van Heurckii* (Japan) but none of those species occurs in such a quantity that it might be said to characterize the collection in its entirety. The following genera are however either very sparingly represented or they occur in not typical species: *Cymbella*, *Epithemia*, *Cyclotella*, *Surirella*, *Fragilaria*, *Denticula* and wanting are: *Pleurosigma*, *Rhoicosphenia*, *Cymatopleura*, *Tabellaria*, *Diatoma*, *Meridion*, *Melosira*.

Dipterocarpaceae

by F. Heim — Paris.

Pour ne pas rompre l'homogénéité d'allure de la publication, consacrée à la flore de Koh-Chang, nous nous sommes imposé de ne pas faire intervenir, dans la détermination des types de cette famille, les caractères d'ordre anatomo-histologique. Nous donnerons, dans un travail ultérieur, la diagnose anatomo-histologique des espèces nouvelles, et préciserons certains points de la structure des espèces déjà connues, mais que nous avons pu étudier, d'une manière particulièrement favorable, sur les échantillons en alcool, rapportés par M. Schmidt.

Dipterocarpus Gaertn. f.

Sect. *Sphaerodes* Dyer.

1. *D. Schmidtii* Heim sp. nov.

Rami novelli, petioli, ramulique floriferi, pilis brevibus, sericeis, applicatis, fusco-griseis oblecti; eisdem pilis paginae margina apice ciliata, nervus medius supra nervique secundarii subtus vestiti. Rami adulti, glabri, nigrescentes, sparsim cinerescentes, lenticellis parvis, longitudinaliter linearibus, vix conspicui.

Stipulæ mox caducæ. Petioli longi (long. 20—25 mm.), supra non canaliculati. Folia, coriacea, in secco fusco-pallida, obovata, basi cuneato — attenuata, apice obtusa, vel brevissime apiculata, nec nitida, margine leviter undulata (90—100 mm. long., 40—55 mm. lat.) nervo medio supra vix prominulo, nervis secundariis (12—14 utrinque) subtus prominulis, margine arcuatis, nervis tertiaris, transversalibus, tenuiter villosis, vix prominulis.

Racemi 5—6 floriferi. Flores magni, subsessiles; calycis tubus coriaceus, infundibuliformis (14 mm. long. — 11 mm. maxim. lat.), laciniis: 2 majoribus linearibus, tubum aequantibus (12 mm. long. — 3 mm. lat.), 3 brevibus (3 mm. long.) reflexis; corollæ tubus subcylindricus, apice subglobose dilatatus (10 mm. long. — 12 mm. max. lat.), lobis lati (32 mm. long. — 12 mm. lat.); antheris angustatis (5 mm. long. — 0,6 mm. lat.), connectivo subulato, antheram aequante.

Fructus immaturus, stellato-pilosus, turbinatus, alarum, nervis vix prominulis. Fructus maturus, sphaericus (diam. 14—18 mm.), laevis, glaucus, apice pruinosis, calycis lobis 2 accrescentibus, coriaceis, glabris, parum inaequalibus, linearibus-oblongis, e basi brevissime angustatis, apice paulum attenuato-rotundatis (130—133 mm. long., larg. 20 mm.), nervis primariis 3, subtus prominulis, ditissime ramosis, calycis lobis 3 non accrescentibus, aequalibus, obtusis (10 mm. long., 6—7 mm. lat.).

A spec. affin.: *Dipterocarpo turbinato* Gaertn. f. differt foliis brevioribus, e basi cuneiformibus, nervis secundariis, numerosioribus, pilosis nec sebris, fructu sphaerico nec ellipsoïde, nervisque alarum lateralibus vix conspicuis.

Jungle near Lem Dan, a very tall tree with bare stem (n° 518 a).

2. *D. angustifolatus* Heim sp. nov.

Rami novelli compressi, puberulo-grisei. Rami adulti mox glabri, fusco-grisei, multis lenticellis punctulati. Stipulae geminae acutae, angustae, fulvo-pilosae. Petioli longi, supra minute canaliculati, pilis fulvis, adpressis, obtecti (25—40 mm. long.).

Folia chartacea, in secco fusca, obquavo-oblonga, basi cuneato-attenuata, apice attenuata, breviter acuminata (130—160 mm. long. — 60—80 mm. larg.), margine leviter undulata nec nitida, in pagina superiore pilis adpressis fulvis fugaibus, praecipue in nervo medio et margine, ciliata, in pagina inferiore eisdem pilis nervus mediis, nervi secundarii (utrinque 12—15) prominuli, margine arcuati dense, nervique teriarii transversales, sparsim obtecti.

Raeemi, glabrescentes, nigrescentes, 5-floriferi. Flores?

Fructus maturus sphaericus, apice paulum turbinatus, laevis, apice leviter pruinosis (diam. 20 mm.), calycis lobis majoribus accrescentibus 3, chartaceis, glabris, aequalibus, longis, linearibus, angustis, basi vix attenuatis, apice paulum attenuato-rotundatis (140 mm. long., 45 mm. larg.), nervis primariis 3, utrinque prominulis, ditissime ramosis, calycis lobis non accrescentibus 3, subaequalibus, obtusis (40—43 mm. long., 7—9 mm. larg.).

Spec. affin. *Dipterocarpo restito* Wall., cuius fructus ignotus, differt praecipue fulvo-pubescentia nec stellato-canescencia.

Jungle near Klong Son, a tall tree (n° 686 a). The native name of this tree is „ton yang“.

4. *D. parvifolius* Heim. sp. nov.

Rami novelli compressi, fulvi, dense tomentosi. Rami adulti mox glabri, nigrescentes, rugosi, lenticellis non conspicuis. Stipulae

mox cadueae, gemmae breves, conicae, fulvo-villosae. Petioli sat breves (10—12 mm. long.), fulvo-villosi, supra minute canaliculati. Folia chartacea, in secco ochracea nec nitide, ovata, basi plus minus attenuata, apice brevissime acuminata (45—75 mm. long., 32—40 mm. larg.), in margine minime undulata, in pagina superiore glabra, in pagina inferiori stellato-velutina; nervus medius supra vix prominulus, nervus medius aervique secundarii (utrinque 9—10), margine arcuati, infra paulum prominuli; nervi tertiarii sub-transversales.

Racemi fulvo-sericeo dense tomentosi, 3—4 floriferi. Flores?

Fructus matus subspheericus (diam. 10—13 mm.), tenuissime granulosus, pruinosus, ad angulos costis sub-aliformibus, angustis (1—2 mm. lat.), calycis alis 2, chartaceis, glabris, subaequalibus, oblongis, e basi paullulum angustatis, apice rotundatis (60—70 mm. long. — 18—20 mm. lat.), nervis primariis 4, utrinque prominulis, ditissime ramosis; calycis lobis non auctis 3, aequalibus (5 mm. long. — 6 mm. lat.) obtusis, 1 nonnunquam paulum accrescente (30 mm. long. — 10 mm. larg.).

Species *Dipt. glandulosus* Thw., *incano* Roxb., praecipue *artocarpifolio* Pierre, *insularique* Hance affinis; a *glanduloso*, ramulis 4—5 floriferis calycisque alis latioribus; ab *incano* foliis basi attenuatis nec rotundatis vel subcordatis, ramulisque paucioribus; ab *insulari* foliis fructusque alis multo brevioribus, calycis fructiferi tubo non piloso sat distincta.

Jungle near Lem Dan, a moderate sized tree (nº 620 a).

Anisoptera Korth.

5. A. *Cochinchinensis* Pierre, in Lanessan — Pl. utiles colon. franç. (1886) 298. — Flor. forest. Cochinch., fasc. 15 (1890), t. 235 A.

Area: Cochinchina.

Lem Dan, Klong Prao in the jungle (nos 225, 405, 713 a). The Siamese name of this tree is „ton tabāk“.

6. A. *marginatoides* Heim sp. nov.

Rami, racemi, flores? Folia coriacea, supra glabra, subtus tenuiter villosa, ovata, e basi rotundata, apice abrupte brevissimeque acuminata (140 mm. long. — 75 mm. lat.); costa supra concava, subtus proeminens, nervi secundarii (utrinque 20—24) subtus prominuli, margine arcuati, nervi tertiarii transversales. — Fructus (immaturus, sterilis) breviter pedicellatus, receptaculo sub-hemisphaericu (diam. 6 mm.), tenuiter punctulato-villoso; stamina persistentia, filamento brevi (0,3 mm. long.), antherarum loculis inaequalibus (in st. major. 1 mm., in minor. 0,7 mm. anther. long.) connectivo longe aristato (in st. major. 2 mm., in st. min. 1,5 mm. long.); stylopodium breve, ovoideo (4 mm. long. — 1,5 mm. lat.) stylo tridentato; calycis alis 2 papyraceis subglabris, linearibus, basi valde angustatis, apice ovato-rotundatis (70—75 mm. long. — 10 mm. max. lat.), nervis primariis utrinque prominulis, alis minoribus, non auctis, 3 brevibus, triangulare-acutissimis (8 mm. long. — 1,5 mm. lat.).

Species *Anisopterae marginatae* Korth. affinis; foliorum nervis secundariis numerorioribus, pagina villosa, antheris brevioribus, aristâ longiore differt.

Jungle at Klong Munsé, a tall tree (n° 508 C).

Shorea Roxb.

Sect. *Eushorea* Pierre.

7. *S. obtusa* Wall. (List. (1828) n° 966).

Var. *Koh-changensis* Heim var. nov.

Foliae pagina inferior non cinerea sed glabra, in axilla neryorum secundariorum pauciorum glandulae nullae; fructus obsphaericus nec lanceolatus, basi alarum omnino tectus.

Klong Sarlakpet in the jungle near the sea, a very tall tree (No. 726 C).

Area of type: Birmania, Cambodia.

8. *S. robusta* Goertt. f. (Fruct. III (1805), 48, t. 186).

Var. *Schmidii* Heim. Var. nov.

Fructum solum vidi, valde majorem (27 mm. long.) quam in typo, cotyledone placentar. multilobulato. Forsitan potius *S. rugari* Pierre. cuius fructus ignotus, referenda.

Jungle at Klong Son (n° 508 e).

Area of type: Cochinchina.

302. — Flor. forest. Cochinch. fasc. 15 (1890), t. 229).

Var. *rigida* Heim var. nov.

Folia rigida, glabra. Sepala petalaque breviora. Stamina 20 nec 25, connectivo non ciliato.

Jungle near Lem Dan, a small tree.

Area of type: Cochinchina.

Pentacme A. DC.

11. *P. suavis* A. DC. (Prodri. XVI, pars 2 (1864), 526).

Var. *Iaevis* Pierre (Flor. forest. Cochinch. fasc. 15 (1890), t. 225).

Klong Prao, on rocks in the jungle (No. 706 a).

Area: Birmania, regnum Siamicum, Cochinchina.

Var. *obtusifolia* Heim var. nov.

Flores? Rami novelli, foliaeque glabri; folia minora, basi apiceque obtusa vel ob-cordata, papyraccea. Fructus immaturus, basi alarum longiorum omnino inclusus.

Klong Majum, alt. 700 ft., on rocks in the jungle; a small tree (No. 595).

Hopea Roxb.

Sect. *Euhopea*.

12. *H. Schmidii* Heim sp. nov.

Rami, racemi, flores? Folia (in specimine unica) papyracea, glabra, in secco prælida, ovata, e basi attenuata, apice abrupte breviterque acuminata (100 mm. long. — 50 mm. lat.), costa supra tenuiter concava, subtus velutino-villosa, nervi secundarii (utrinque 19) tenuiter prominuli, areuati, demum intramarginales, nervi tertiarii transversales, ditissime ramosi.

Fructus maturus, ovoïdeus (13—14 mm. long. — 8—9 mm. lat.), calycis basi inclusus, apice liber. Pericarpium crustaceum; calycis alae 2 magnae, glabrae, nitidae, aequales, lineares, areuatae, basi laeviter angustatae, apice rotundatae, nervis primariis (7—9) utrinque tenuiter prominulis, nervis tertiaris transversalibus tenuiter ramosis; calycis lobi non aucti 3, breves, subaequales, ovato-rotundati (60 mm. long. — 50 mm. lat.); embryo ovoïdeus, carnosus (20 mm. long. — 21 mm. lat.), cotyledonibus inaequalibus; cotyl. exteriore emarginato, profunde bilobato, cotyl. placentar. duplo brevioris, lobis liberis.

Jungle near Klong Son (No. 508 a).

Sect. *Dryobalanoides* Miq.

13. *H. siamensis* Heim nov. sp.

Rami, ramuli, folia, flores? Fructus (maturus) parvissimus, breviter pedicellatus (1 mm. long.), ovoïdeo-conicus (7 mm. long. — 5 mm. lat.), acumine brevissimo (1 mm.), acuto, stylopodio vix conspicuo, glaberrimus, calycis lobis basi inclusus, apice liber; alis 2 laeviter inaequalibus (36—38 mm. long. — 7—8 mm. lat.), attenuatis, apice rotundatis, glabris, nervis primariis vix conspicuis: 7; calycis labis non auctis, ovato-rotundatis, brevibus (5 mm. long. — 5 mm. lat.), cotyledonibus carnosis, cotyl. exteriore apice emarginato, convexo-concavo, cotyl. placentar. profunde bilobato, triangulare-pyramidalato, radicula fere inclusa.

Species *H. Treubii* Heim affinis; ab hac specie fructus exiguitate sat distincta.

Jungle near Klong Son (No. 508 c).

Sect. *Hanca* Heim.

14. *H. avellanea* Heim nov. sp.

Rami novelli compressi, cinereo-nigrescentes, glabri. Folia parva, glaberrima, in secco avellanea, chartacea, margine revoluta, ovato-

lanceolata (45—55 mm. long. — 15—26 mm. lat.), acuminie breve spatulato (4—6 mm. long.); petiolus brevis (4—5 mm. long.), supra minute canaliculatus; costa supra tenuiter concava, subtus valde proeminens; nervi secundarii numerosissimi, supra vix conspicui, subtus alteri prominuli, arcuati, demum intramarginales, alteri alternantes, paralleli, vix conspicui, nervi tertiarii transversales, non bene conspicui. Racemi tenuissimi, ut videter multifloriferi. Flores? Fructus maturus (in specimine unicus) parvissimus (7 mm. long. — 5 mm. lat.), breviter pedicellatus (1,5 mm.), breviter ovoideo-acuminatus (1 mm.), stylopodio nullo, basi calycis omnino inclusus, alis 2 aequalibus, glabris nec nitidis, basi valde attenuatis, apice attenuato-rotundatis (33 mm. long. — 6 mm. lat.), calycis lobis non acutis 3; 1 subaliforme (7 mm. long.), 2 brevibus, ovatis (5 mm. long. — 4 mm. lat.). Pericarpium crustaceum. Embryo (immaturus) *Hanceae*, cotyledonibus valde inaequalibus, radicula exserta.

Species *H. griseæ* Brandis affinis; ab hac specie petioli laminaeque exiguate sat distincta.

Klong Munsé, branches and fruit shot down from a very tall tree in the jungle (No. 420).
